Important Notices

To avoid unwanted damages, please read the following information before using MEIZU M571H.

- **Traffic safety** Please comply with all local laws and regulations. Keep users' hands free while driving.
- **Safe operation** When using a wireless device may cause interference or danger; turn the phone off.
- **Interference** All wireless devices may be susceptible to interference, which could affect performance.
- **Hospitals** Please turn off the phone in hospitals during situations where it may interfere with medical equipment.
- **Flights** Follow safety instructions provided by airline staff. Wireless devices can cause interference in aircrafts.
- **Gas stations** Do not use the device at gas stations when refueling. Do not use this device near gas or other chemicals.
- **Demolition sites** Follow any local restrictions. Do not use the device near demolition sites.
- **Service & repairs** Only qualified personnel may service or repair this device.
- **Accessories** Please use original accessories and batteries. Do not use incompatible products.
- **Water damage** This device is not water resistant. Keep it dry.
- **Backups** Back up important information stored on the phone to prevent the loss of valuable data.
- **Connecting with other devices** Before connecting to any other device, read its user guide for detailed safety instructions. Do not connect with incompatible products.
- **Emergency calls** After starting up, ensure the phone has network reception. If necessary, unlock the device from standby mode. Open the Phone app, enter the emergency number, and tap the call button. Tell the emergency staff about users' location and the relevant circumstances.

Getting Started

Accessories

Included in package:

USB cable

Power adapter

SIM eject tool

Warranty Certificate

- The above picture is only for reference, with the possibility that accessories available in users' area are different.
- users can buy accessories from a certified MEIZU store, or the official MEIZU website (<http://en.meizu.com>).
- Please only use software from MEIZU' s official software center. MEIZU will not be held accountable for any problems caused by unofficial software.

Buttons

Using M571H, different keys gives users access to different phone functions. Here are some commonly used shortcuts and methods of operation.

Power button

Briefly press this button to lock / activate the screen;
Holding this button will cause a "Power Off/Restart" dialog box to pop up;

Volume keys

Increases and decreases volume;

Home button

When locked, double tap the home button to activate it;
When unlocked, tap to return to the Home screen;
During a call, press the Home button to return to the Home screen.
The Power button can be used to hang up.

Battery

Charging the battery

M571H is equipped with built-in rechargeable battery.

Note: Do not attempt to remove the back cover to take out or repair the battery.

Use only the supplied power adapter and USB cable to charge the battery. Do not remove the battery from the phone when charging the phone through power adapter or automobile-used adapter.

- How to charge the phone:

1. Make sure the USB cable is placed correctly, and then plug the cable into the M571H's micro USB port which is in the bottom of the phone;
2. Plug the power adapter into a power outlet with standard AC power applicable to the phone.

If the battery is critical, the M571H will not boot. Connect it to a power adapter, and M571H will display the charging animation. The Locked screen would display charging status. When the battery is full, a full green battery would be shown on the Locked screen, and the animation stops. Disconnect the power adapter from the power outlet, and then disconnect the M571H.

Note:

1. If the battery is critical, the M571H will not boot. Please try booting after 5 minutes of charging.
2. It normally takes 2-3 hours to fully charge the phone. This can vary depending on if the phone is on, if there are any calls while charging, etc.
3. For safety reasons, please use the standard USB cable and power adapter.

Touch Screen

The main way to control the phone system is using users' fingers to operate icons, buttons, menu items, the keyboard and other items on the touch screen.

What' s more, users can change the direction of the screen.

- Touch / tap

Touch the screen gently with users' finger.

- Hold

Use users' finger to touch and hold on the touch screen.

- Double-tap

Tap the screen twice.

In the web browser, users can swipe to browse fastly. users can also double tap to zoom in and out of the web page.

- Drag

Touch and hold an icon, and then move it to a desired location.

- Quick swipe or Swipe

Swipe users' fingers vertically or horizontally with quick dragging motion. users can switch content pages within an app by using this gesture.

- Pinch

In some applications such as the Gallery or Browser, users can use two fingers to pinch and zoom in and out of photos and web pages.

- Rotate

When supported, the phone automatically changes screen orientation depending on how users hold it. This can be turned off under "Settings" > "Display"

- Function zone

1. Unresponsive zone
2. Multi-tasking zone
3. Returning zone
4. Multi-tasking zone
5. Unresponsive zone

Firmware Upgrade

How to upgrade the firmware

1. Use the USB cable to connect the Meizu M571H with a computer, and copy the new firmware (update.bin) to the M571H root director ;
2. Safely unplug the USB and turn off the Meizu M571H

Note: Please make sure the phone has sufficient battery, or it might be unable to upgrade or boot due to power failure.

3. Start the phone while simultaneously holding the "Power" button and "Volume Up" button (as pictured).

4. Wait until the "System Upgrade" appears on the screen.
5. Tap the "Start" icon to begin the upgrade process or tap the "Cancel" icon to exit upgrade mode.
If data erasing is needed, please check "Clear Data" option before upgrading. Only the phone data (such as notes, messages, contacts) will be removed. Data on the SD card (such as music and photos) will remain intact.
6. Do not power off the device while upgrading.
7. When the upgrade is complete, M461 will automatically reboot.

* To download the latest firmware, software and drivers; please visit <http://www.meizu.com>

Note: Emails are not backed up on Flyme. When clearing data, users will lose all users' emails. users can also upgrade the firmware by system-provided upgrade function; more details please go to "Settings" > "About phone".

Note : Please use only firmware that is approved by Meizu, or the phone might be exposed to phone breakdown, file missing, password compromising, and etc. All losses and risks due to this reason shall be assumed by the users.

Power on, off and Lock screen

Powering on

Hold down the "Power button" until the phone shortly vibrates and the "HUAWEI" Logo is displayed.

If users' SIM card on the M571H has a PIN code enabled, users will need to enter a PIN code after powering on the phone.

If users enter the wrong PIN for three times, users will need users' PUK code to unlock the device. Please contact users' network operator for users' PUK code.

Restart or powering off

To power off or restart the phone, hold down the "Power button" until the popup selection box appears, and then select "Power off" or Restart".

Locking and unlocking the screen

Unlock and passcode

1、 Smart wakeup:

This function will enable users to unlock the phone or enter to the designated apps under the sleeping screen.Under the sleeping screen:

- a. Slide up: Unlock the screen and show the page before screen locking;
- b. Slide leftward: Activate camera
- c. Slide rightward: Enter the app defined by users (Settings> Accessibility > Smart wakeup)
- d. Double tap: Light up the screen

Users can define their own gesture by changing the settings in  : Settings> Accessibility> Smart Wakeup

2、 Set locking passcode: A passcode can better protect users' privacy

Users can enter settings by tapping  > Security and Location  > Passcode lock> Turn on passcode lock.

Organize the screen

The screen displays icons of all apps, widgets, folders and wallpapers. On the screen, users can swipe leftward or rightward to see apps on each page, and tap on the app icon to launch the app.

1、 Icon layout on the screen:

The Home screen is where users start. A reasonable and user-friendly layout can bring better user experience. To manage the icons on the Home screen, users can simply drag an icon to a wanted position and release it to finish the moving.

2、 Remove apps from the Home screen:

Hold an app icon until  emerged, drag the icon to the trash can and release it to finish uninstallation.

3、 Add or remove widgets:

Hold a widget (e.g. Weather) until the trash can icon  emerged on the top of the screen, drag the widget to the trash can and release it to finish deleting.

4、 Folders :

Create folders: Drag one icon to another icon, a new folder would automatically be created.

Delete folders: Apps can be dragged out of the folder. When there is only one app left, the folder will automatically be deleted.

5、 Quick search: Slide down anywhere on the screen can activate Quick Search which can be used for app, contact, message searching, etc. Online data can also be searched by Quick search.

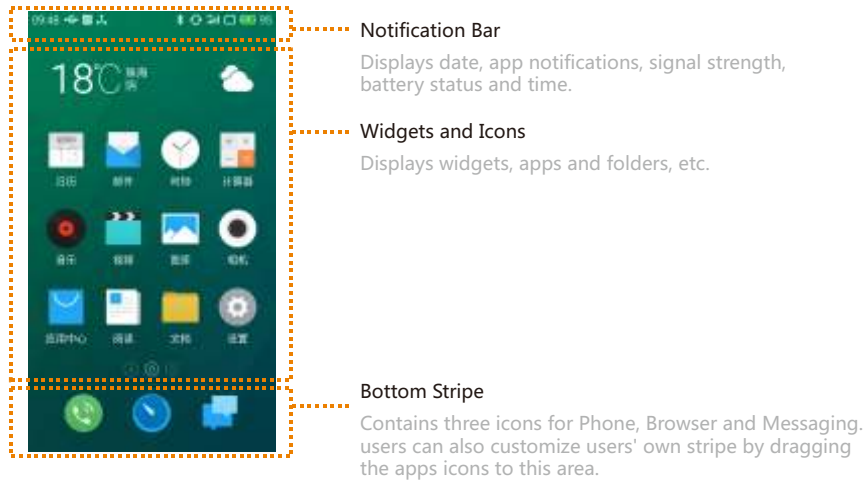

Notification bar and multi-task

Notification bar

- 1、 Activate notification and multi-task bar: slide down from the top of the screen;
- 2、 Check, reply and delete notifications: slide up and down on the notification page can see all the notifications, slide horizontally to delete an item. Tap an notification item to enter the corresponding app;
- 3、 Switch control: tapping a switch icon can turn on/off the corresponding function (such as Wi-Fi ). Users can slide down  to see the hidden switches, and slide upward  to hide it again. Hold an icon can move and change the icon positions;
- 4、 USB file transfer: Users can choose from different connection modes based on the situation: photo transferring  or file transferring .

multi-task

- 1、 Switch between tasks: All apps and tasks except the current one would stay backstage; users can check all tasks in pulled notification bar and tap on an app icon to enter it.
- 2、 Clear backstage tasks: On multi-task bar, users can drag an icon upwards to close the app, or slide downwards to clear all backstage apps.

 button Tap the  button to enter the Phone function;

 button Tap the  button to enter Web Browser;

 button Tap the  button to enter Messaging.

Notification Bar

This bar displays date, notifications (such as new email, calendar reminder, alert, current calling status and the device status, etc.), signal strength, battery status and time.

- **SIM card status display**

When there are 2 SIM cards installed on the phone, the status icon of SIM 1 would be on the left side of SIM 2 icon. The icons on status bar shall display the exact status of corresponding card: signal intensity, network mode, service status, and etc.

- **Open notification bar**

Notification bar: Show users' network provider and all other received notifications.

When notification is received, slide down from the Notification bar and a panel will be dragged out. Touch on the notification can open the corresponding app. For other notifications such as new voice mail or network off-line, users can open the network list directly in current page to reconnect to the Internet. Slide the read notifications to delete.

- **Close notification bar**

Hold and slide up the  icon to close or touch anywhere outside the notification bar.

Basic Operations

How to Start

When using the M571H for the first time, please follow the steps outlined below:

1. Connect the M571H to users' computer with the USB cable, which will simultaneously charge the M571H.
2. Pull the notifications bar down > tap "USB Storage" control key (lights up when turned on) to turn on storage connection to users' computer;
3. Copy music, videos, photos and other files from users' computer to corresponding folders on the M571H.
4. Pull the notifications bar down > tap the "USB Storage" control key (lights down when turned off) to terminate the connection to users' computer.
5. Disconnect the USB cable of the M571H and computer.
6. Start using the device.

users can begin listening to music, watching videos and making phone calls by tapping corresponding icons to launch the apps on the Home screen.

File Transfer

Note: Please make sure the M571H device is connected to the computer.

users can download music, video, photos and other files from disks and websites and then copy them to the M571H USB device. The following the example shows how to copy music to M571H:

1. Select the documents users want to copy on users' compute;
2. Select [Copy] or press Ctrl + C;
3. Double-click [Computer] desktop icon to open the Computer window and double click [Removable Disk];
4. Browse to the Music folder.
5. Select [Paste] or press Ctrl + V.
- 6 When the files have been copied, the music files will appear in the [MEIZU M461] Music folder.
Disconnect the device and launch the Music app to listen to music.

For the M571H to automatically recognize users' media, please place the files to their corresponding folders on the M571H: copy videos to the Video folder, photos to the Photo folder, music to the Music folder, or the program of M571H may not be able to recognize the files correctly. users can browse through all files in the Documents app.

Safe Removal of Disk

With an active USB connection, files can be copied between the M571H and the computer.

1. After connecting M571H to the computer, open "Removable Disk" ;
2. Copy the selected audios, videos, pictures and other files to the computer;
3. After saving the files, click the  icon on the computer taskbar;
4. Click on the below message when it appears;
5. "Safety Remove Hardware" window will be displayed.
6. Confirm by clicking the "OK" button and then unplug the USB.

To keep users' data safe and the disk free from damage a removable disk, always safely disconnect users' hardware from users' computer. If the dialog box below is shown, it does not mean that the product is faulty. Simply wait a moment and try again.

Network Connection

Note: Make sure the SIM card has been inserted into the M461.

Setting up data connectivity

With just a few simple steps, users can unlock the M571H's data networking capabilities which gives users connectivity with the world anytime, anywhere.

1. After starting the phone: go to "Settings" > "Networks" and activate the "Enable data" switch.
2. Select users' carrier or operator under "Access Point Names".
3. Under "Network mode", select , "2G only" or "3G preferred" or "4G preferred"
4. Tap the Back key < to complete the setup.

When data connectivity is not needed, it is recommended to deactivate the "Enable data" switch.

Note: Before using the network, please confirm users' data consuming status or use WLAN whenever possible to avoid exceeding users' data package plan.

App Guide

Phone

Before making a call, please make sure that there is network connection.

Tap Phone icon  to launch the Phone app.

Dialing a number

- Direct dialing
Tap  to enter dialpad, dial numbers and then choose SIM 1 or SIM 2 to make the call by tapping  to call.
Use the  button to correct any mistakes. If the phone number is from a saved contact, the contact name will be displayed on the dial screen. and users can tap it to make a call.
- Make a call from History
Tap  to view recent call history list. Tap the avatars or icons on the left side can call back immediately.

Answering the phone

When there is an incoming call, the contact information of the incoming caller is displayed, together with a ringtone or vibration. Drag the  icon to  to answer the call, and drag it to  to reject the call.

When there is an incoming call, tap  can mute the ringtone and tap  to hang up the phone and reply a message instead.

While answering the phone, users can carry out the following operations:

- Tap  button to enter Contacts list and check contacts' information;
- Tap  to shutdown microphone for current call so the caller cannot hear users' voice;
- Tap  to record current call as audio; users can find and play the audios in folder Files>Storage>Recorder>Call.
- Tap  to write down things need to be saved which can be found in Memos after finished the call;;
- Tap  to activate dial pad, which can be used to input information that required by auto voice response system.
- Tap  to enable the loudspeaker;
- Tap  to end the call.

Adjust the receiver volume

During a call, users can press the volume key on the left side of the phone to adjust volume of the receiver. Press up key to volume up and press the lower key to volume down.

Call holding

During a call, if there is a second incoming call, users will have the choice to hang up the current call and take the new call, hold the current call and take the new call, or reject the incoming call. This feature is only available if users' carrier supports it.

Call holding can be turned on and off from "Phone settings" > "Call holding". If a second call is connected, the first call will be automatically put on hold.

Conference calls

Conference calls, which allow more than two people to talk at once, are also supported if supported by the carrier.

- How to establish a conference call:
 - 1 Start a normal phone call.
 - 2 When the second phone call connects, the first call will be put on hold.
 - 3 Tap the [Merge] button, which will initiate conference calling. If successful, multiple names will be displayed on the call screen and all three callers can hear each other.

While in a conference call, tapping the "Hold" button will put all participants on hold. Tapping the "Hold" button again will resume the call.

Making an emergency call

As long as users' phone is in a GSM service area, users can make an emergency call, even if there is no SIM card in the phone. Dial 112 (China) to make an emergency call.

Note: A password locked or PIN locked screen can still be bypassed by tapping on the emergency call button.

To hang up, either press the Power button twice, or swipe the the top call drawer downwards. Use the volume buttons to mute an incoming call. Once connected, the in-call interface is displayed. Missed calls are displayed in a notifications box on the lock screen.

International calls

In the dial pad, tap and hold the [0] button until the "+" sign appears. Enter the country code, area code and phone number and tap .

View call log

1. Tap  to open up the call log.
- 2 Tap a contact on the list for detailed information including call details, phone numbers, etc.

If the phone number belongs to a contact in the contacts list, their contact information will be displayed in the call log. To clear all call history, tap on the Menu key "... " and tap the "Clear call log" button, and then confirm by tapping "OK". The call details include information on phone numbers, contact names, email addresses, group, call

records, and more. If the number does not belong to a contact, users can add it to a new contact by tapping the number and then choose "Add to New Contact" to save the number as new contact or add to existing contact.

On the call details page, users can tap the  icon to send messages to the number, or users can call the number by tapping it.

Search for contacts

M461 can match the inputted letters with the Chinese and English initials of contacts' names. For example, users can type "BD" and the phone will match "Bob Dylan" (only when the contact exists).

Tap on a certain contact and then users can see the details of this contact. In the details page, users can tap  icon to send a message to the contact, or users can call him directly by tapping the number.

Contacts

users can save contact names in the M461, together with phone numbers and other related information.

- New contacts
If a stranger calls users, emails users, or sends users a text message; users can save the contact information to a new contact.
- Adding new contacts
To add a new contact, tap the phone Menu key "... " > "New contact" button. Then, input related content such as name, phone number and email address. Tap "Add another field" for additional items. users can tap the  icon which is left to the typed item and choose the item tag users would like in the popup box.
- Add a contact from the dial pad
 1. Dial the number on the phone dial pad, tap on the  icon, and then select between "Add to new contact" or "Add to existing contact".
 2. Edit the contact information, then tap "Save".
- Add or change contact display picture
 1. Tap  and select a contact.
 2. On the contact details screen, tap the Menu key "... " > "Edit" to enter edit mode.
 3. Tap picture area and then select between "Take photo" or "Choose photo from gallery" .
- Deleting contacts
Tap  and select a contact. Tap "... " > "Delete", and confirm by tapping the "OK" button.
- Sharing contacts
Tap , and select a contact. Tap "... " > "Share", and several sharing options will appear, which allow users to share contacts by "Email", "MMS", and "Bluetooth".

Note: If there is a third party app, a contact can also be shared via the apps.

Phone settings

While in the Phone app, tap the Menu key "... " > "Phone Settings".

- **Contacts**
 - Contact accounts: set up Exchange accounts and select default account.
 - Import and export contacts:
 - Import contacts: Check Vcard files > "Import" ;
 - Export contacts: Check groups or contacts > "Export"
 - SIM contacts: users can view, import and delete contacts that saved in users' SIM card.
- **Call**
 - Vibrates when get through: Upon activation, the phone will shortly vibrate when an outgoing call gets answered by the other party;
 - Prefix/IP number: Set up a prefix/IP number and when long hold the calling key, the prefix will add to the number automatically;
 - Quick dial (only available on CMCC model): hold a number when dialing and a preset number will be dialed.
- **Incoming call**
 - Message recording: When there is no one to answer the phone, the phone will automatically answer the call and instruct the caller to leave a voice message;
- **Spam call filter:** Interception records will be saved in the Spam Call list. The list will synchronize with Flyme public blacklist and numbers added by the user. When enabled, calls from strangers except International calls will also be blocked.
- **Call forwarding:** Call forwarding enables users forward all users' incoming calls to other telephone number. This feature requires network support; please contact users' network operator for more information. Call forwarding has the following options:
 1. Always forward: Forward all calls.
 2. Forward if busy: Forward calls when on the line.
 3. Forward if unanswered: Forward unanswered calls.
 4. Forward if unreachable: Forward calls when not in service.
 5. Disable all call: Cancel all call forwarding settings
- **Call waiting:** To notify incoming calls when users are on the line. This function needs network support.
- **Other settings**
 - Flyme communication: when enabled, this function would allow users make free web calls and send free messages;

1. Call or text contacts with Flyme communication: messages can be sent in Flyme communication column  , and free calls can be made in calling log  .
2. The contacts online status can be checked in contacts list, calling log or contacts details page with the mark  .

Auto Call Recording: when this function is turned on, the system automatically records all calls without opening the calling interface. Users can choose record all calls or only record calls with certain contacts.

STK apps: these apps are functions provided by the carrier which the SIM card belongs.

Messaging

The Messaging app makes it easy and intuitive for users to send and receive text messages. Messaging app can be launched by tapping on the Messaging icon  on the Home screen.

Creating and viewing messages

1. Tap the  button to start writing a new text message. Enter the recipient number directly, or tap the right  button to browse the contact list. users can also send a message from the Home screen  >  > contacts list, select contact > tap the  button to the right of the phone number;
2. Type users' message, then tap  "Send";

Contacts: When the number matches those of existing contacts, a drop-down menu will be displayed for users' selection.

Replying

1. In the dialog list, tap on any one to open the dialog;
2. Tap the text input zone at the bottom of the screen, type in users' reply; then tap  to send.

Forwarding

1. In the dialog list, tap on any one to open the dialog;
2. Tap and hold a message;
3. Tap "Forward" from the popup box;
4. Enter the recipient, then  to send.

Deleting a dialog

1. In the dialog list, tap the dot that is right to the dialog which users want to delete, check it (or check as many as users want);
2. Tap the  button to delete;
3. In the confirmation box, tap "OK".

NOTICE: The deleted messages cannot be resumed, please operate carefully.

Deleting a certain message within a dialog

1. In the dialog list, tap on any one to open the dialog;
2. Tap and hold the message which users want to delete;
3. Tap "Delete" .

Smilies and MMS

1. Tap the  icon to create new a message;
2. Tap the  button and choose the content which users want to add.
users can tap  icon to switch to smilie keyboard. Smilies and contacts information (text form) will be delivered as short messages, while contacts Vcard, photos, audios and videos will be delivered as MMS. The MMS attachment size cannot exceed 300 Kb. Sending a MMS requires corresponding carrier service and correct settings.
3. Tap  to send.

Search

1. Tap “...” under the dialog list;
2. Enter the search term users are looking for in the search dialog box.
3. Relevant information will be displayed in the results list automatically.

Settings

Tap the Menu key “...” under the dialog list to set up the following items:

- Display
 - Notifications: When activated, message content will be displayed in the notifications bar when users receive a new message.
 - Delivery report: When activated, a delivery report will be requested for all messages sent. It is a service provided by the carrier which enables the system to show whether the message is successfully delivered.
 - Allows screen rotation: Allows horizontal screen when it is selected.
- Advanced Settings
 - Spam filter: Filtered messages will automatically be moved to trash. It is also possible to sync with the Flyme public spam list to block numbers reported by other users. Smart filter is available which can spam the messages by judging through the contents;
 - Roaming auto-retrieve: Automatically download message data when roaming.
- Other settings
 - Flyme messages: When activated, users can receive Flyme messages for free;
 - SMS center: Set the number of the SMS center.
 - Web message storage: Tap to turn to the storage directory of web messages so as to facilitate the file managing for the users.

Browser

M571H makes users' web browsing experience more convenient and exciting. To start surfing, tap the Browser icon  on the Home screen, or type users' desired URL in the Quick Search Box.

Launching through the Browser icon

Tap the Browser icon to launch the browser and load the home page in full screen mode.

- Open a web page
 1. Tap the top URL input box.
 2. Enter the desired URL.
 3. Tap the 'Go' button on keyboard.
- Browse and edit light apps
 1. Tap  on the bottom bar of the browser, slide left , or tap the tag icon, and then visit the wanted light app;
 2. Tap  to enter light app center, and then tap the '+' icon to add an app to light app page;
 3. Hold a light app to make it floated so as to remove, open it in new page or open it in background.
- Browse web guide and most-visited websites

Website settings: Manage advanced settings of websites.

Reset to default: Restore all browser settings to their original state.

Email

M571H adopts standard mail system which enables users read and send emails via Email app. It's configured to work with most major email providers.

On the Home screen, tap the "Email" icon to launch the app.

Open Email and account page

users can read users' mails in Email apps.

- Open Email app
Tap the Email icon on home screen; if users are using this app for the first time, users need to go through a tour which will lead users to set up users' Email account; after setting up, the app will show users' inbox.
- Open account page
Tap Email app icon to enter inbox.
The recent Emails will be displayed, while the earlier Emails need to be downloaded by sliding down the screen.

Mails

users can read and write mails in "Inbox" or any other folders of valid account.

Slide right the screen to see a side bar on the left screen, users can tap on the folders such as "Sent" , "Trash" , "Notes" , etc.

On the page of mail list, users can tap on the dot on the right side to select mails and to move the mails to another folder.

Tap  to update

Tap  to write a new mail.

Tap  to search.

Replying to emails

users can reply, forward, delete or manage messages users receive.

- Reply or forward
Enter the Inbox and tap on a title to see the mail content
 Reply ;
 Reply all ;
 Forward ;

- Mark it as a new (or read) mail
When reading a mail, tap "... " > "Mark unread" .
- Delete a mail
users can delete mails by tapping the dot right to the mail title and then tap  to delete, or users can tap "... " > "Delete" after reading the mail.
- Starred mails
On the mail list page, users can tap on the dot right to the mail title > "Add star" to mark the mail. users can slide right the screen to activate side bar and tap "Starred" to see all users' starred mails.
This setting will be synchronized in email server.

On most types of accounts, deleted messages are stored in a folder. If users deleted emails by accident, it is often possible to recover them. In the Email app, slide right the screen to activate side bar, and then open the "Trash" folder.

Composing and sending email

users can send emails to individual contacts or groups.

1. In the Email app, tap the  button to start writing;
 2. Enter the recipient's email address; when there is a suggested address from existing contacts users can touch it to add to recipient;
 3. Enter the desired "CC / BCC" addresses. Tap the "CC / BCC" button reveal two fields, for "CC" and "BCC" respectively.
 4. Hold "Recipient" or "CC/BCC" , the address would be movable, users can drag the address to the column users want;
 5. Type users' subject;
 6. Type users' message.
 7. Tap "Attach" to add files to the email. Tap  to add photos from Gallery, Tap  to send.
 8. When ready, send the email by using the "Send" button.
If users are not ready to send, tap the Back key. The email will be automatically saved to Drafts.
- Account folders
Each account has Inbox, Drafts, Outbox, Sent, Trash and Spam folders.
Depending on users' email provider, users might have additional folders.

Adding and editing email accounts

The first time users open Email, users are prompted to set up an email account. After this, users can configure the Email app to receive and send email from other accounts. Accounts are configured from the Email settings screen.

The email setup wizard can help users set up most popular email providers, including those based on POP3, IMAP and SMTP. users can also configure an Exchange account.

- Add account
 1. Open the Email app.
 2. Tap  > "Add account"

In the setup process, enter users' email address, password, and name (optional). If users have multiple email addresses set up, users can select a default account for outgoing email.
 3. Select the appropriate account type and tap "Done".

Settings can vary depending on the email provider. If users are unsure of the settings, please contact users' email service provider.

If the setup wizard requires additional information, users will be prompted to enter more details after tapping "Done". Contact users' email service provider if users are unsure of the required settings.

Once set up, emails will be synced from users' mail server, and users can start using the new account to send and receive messages.

E-mail account settings

Tap  > tap to choose an account.

- Synchronization Frequency
Select Sync → select synchronization frequency: "Three days" , "One week" , "One Month" or "All" .
- Incoming settings

Gallery wallpapers: Tap 'Gallery wallpapers' (load from Gallery) > 'Set'.

Networks

- **Mobile data:** This phone is a dual cards dual standby phone. The system would recognize the SIM card type, and users can set the on-off switch by themselves.
- **Network mode:** Automatically switches the network mode between 3G, 3G and 4G (needs to be supported by SIM card). 4G SIM will show 4G, 3G, 2G; and 3G SIM will show 3G and 2G; 2G SIM will not show network mode information;
- **Data roaming:** When enabled, data access will be available when roaming;
- **APN:** Set up carrier access point names to enable data. All data transmission through GPRS shall pay corresponding fees to network carrier;
- **Portable hotspot:** Set up and manage wireless portable hotspot. Portable hotspot shares your mobile data connection through WLAN, USB connections or Bluetooth tethering;
- **VPN:** Set up and manage VPNs.
- **PPPoE:** Set up PPPoE username and password settings.
- **Network carrier:** Users can choose network carrier service. If you select a network manually, when there is no available network, the notification bar will show 'No Service' and under that circumstance you cannot use network; if you set the network settings on Auto, M461 will search for available networks.

WLAN

When turned on, WLAN will be enabled and users can choose networks to connect to the Internet.

Tap 'More'

- Connect to network: User-defined network which can configure name and security (None, WEP, WPA/WPA2 PSK, 802.1x EAP, WAPI PSK);
- Connect via WPS: Connect to nearby WPS networks.
- WLAN Direct: Search for WLAN Direct network;
- Advanced settings: WLAN settings

Bluetooth

M461 uses Bluetooth technology to wirelessly connect to other Bluetooth devices to exchange data, making calls or execute remote control.

Tap the button to turn on/off the Bluetooth. When turned on, the device will automatically search for other Bluetooth nearby.

When 'Discoverable' is turned on, other Bluetooth devices nearby can find M461. If 'Discoverable' is turned off, other Bluetooth devices cannot find M461.

Note: The phone might be incompatible with other devices, and the Bluetooth connections will be affected by the environment.

Display

- Brightness
Screen brightness: Use the slider to adjust screen brightness. Higher brightness uses more battery.
Light sensor: Automatically adjust screen brightness according to the environment when turned on.
- Display
Sleep: Set the amount of time before the phone goes to sleep. Sleep time is not recommended to be set to too long, as it uses battery and may damage the screen.
Font size: Set the font size for calling history, contacts, messages and etc.
Battery percentage: When turned on, the percentage of battery remained will be shown on the notification bar.
Power-saving mode: Adjusting the screen energy consuming according to the displayed content; this function can save energy up to 50%, however, the colors in certain scenes might be distorted.
Wireless display: To turn on/off wireless display.

Sound

- Sound
Silent mode: In silent mode, all sounds are muted except for when the alarm starts.
Vibrate when ringing: The Vibration switch allows you to turn the phone vibration on or off.
Volume: You can set the ringtone volume by dragging the volume slider.

- Ringtone and notification

Notifications: Set the ringtones for inserting USB, finishing charging, warning or sending mails;

Touch sounds: Set ringtones for touching the Home button or moving the app icons;

Screen lock sound: Turn on the ringtone for locking and unlocking the phone;

Dialpad tones: Turn on the ringtones for dialpad;

Keyboard: Turn on the ringtones for typing the virtual keyboard;

Camera sounds: Turn on the shutter sound for photo shooting.

Security

Passcode lock:

Set up screen lock to prevent the phone from being used without permission.

1. Enter 4-6 digits to create a passcode > tap 'Continue' > enter the password again > done;
2. Complex passcode: a combination includes both numbers and English letters;
3. Lock display
4. Lock apps: add locked apps so these apps cannot be viewed randomly;
5. Guest mode: When enabled, entering guest password can enter the phone in Guest mode which enables the guest to view certain apps.

Location services

- Location services
Turned on location services: record locations information.
- Location sources
Only after turned on location services can a user turn on GPS locating and location services.

Language and time

- Language
Set cellphone language from Chinese (traditional), Chinese(simplified), English, French, Italian, Portuguese, Russian, Spanish, German, Hebrew and etc.
- Keyboard
Set up input method settings.
- Date and time
Automatic: Automatically acquire date and time settings from carrier.
Select the time zone: Tap to manually set the time zone.
Set Date: Manually set the system date with 'Automatic' turned off.
Set time: Manually set the time with 'Automatic' turned off.
Use 24-hour format: Use 24-hour time format instead of AM/PM.

Apps

Users can view all the apps and clear apps data to retrieve them to their initial status without cache. Users can also uninstall apps, modify the apps' permissions, check and stop the backstage apps and services.

Security Center

Security Center, which can be accessed by tapping the app icon on the Home screen, provides six system security protecting functions: system cleaning, large file managing, App cleaning, virus cleaning, permission managing and traffic managing.

System Cleaning

- System cleaning

Tap  to enter System cleaning and then tap 'Scan' to detect 5 types of system junk: system cache, app cache, useless file, redundant install package and junk of uninstallation. After scanning, tap 'Clear Now' to clear up the system junk.

Large file managing

Tap  to enter Large file managing and then tap 'Scan' to detect files which are larger than 10MB.

App cleaning

Tap  to enter App managing in which you can learn the usage of the apps including how many days haven't they been used and how much storage do they take; moreover, users can delete apps in App managing.

Data Controlling

- Traffic settings

Tap  and then choose 'Traffic settings' to set the limit of monthly data plan. After users finished their settings, the system will track your traffic usage and send alerts promptly whenever necessary.

- App data managing

Tap  to check monthly data consumption of each app. Users can also control individual app's data switch.

Authority Managing

- Authority settings

This function contains 4 types of authority settings: auto-run settings, notification settings, security-related settings and privacy settings.

- Authority settings of apps

Tap  to check and set the authority details of each app.

Virus cleaning

- Tap  to enter virus cleaning, which will automatically scan the virus one users enter; the scanning includes malicious app, vulnerable apps, payment risk and ID theft risk.

After scanning, users can deal with the results.

- Cloud scanning and killing

When scanning the phone for virus and junk, cloud scanning function will enable connections to the network and scan the cloud and send feedbacks to the phone.

- Trusted apps

Apps will not be scanned if they were added to the trusted apps list.

Phone Finder

The client app of Phone Finder can be downloaded in App Center.

When a user accidentally loses his phone, he can execute operations through the Phone Finder client app or the Flyme webpage, so as to protect information security and help retrieve the phone.

The Phone Finder client application supports mainstream Android phones.

Note : Phone Finder requires user's login with Flyme account. The system will automatically enable Phone Finder once login.

Login

- Log in with Flyme account (password will be needed in every enter)

Operations

- Log in with the same Flyme account in multiple devices and then select the device which needs to be found.

1. Find your phone

Tap  on the bottom bar and execute operations to find your phone:

- Remote shooting: Tap  can execute operation of photographing; the picture details will be sent back to the client app;
- Sending messages: Tap  to send text messages to the targeted phone;
- Sending sound: Tap  to play the default sound to help retrieve the phone;
- Obtaining numbers: Tap  to obtain the current phone number of targeted phone;

2. Data security

Tap  on the bottom bar to execute operations to secure your data;

- System locking: Tap  to lock the targeted phone; to unlock the phone, please enter password of currently logged-in Flyme account;
- Data erasing: Tap  to erase data on the targeted phone; the logged-in Flyme account will not be erased;

3. Status information

Tap  on the bottom bar to check status information:

- Device name, which shows the name and IMEI of the device;
- Network status, which shows the network connection of the device. This function enables users to turn on the network connection of the targeted device so as to execute operations;
- Current number, which shows current SIM card phone number on the targeted device;
- Historical locate, which shows the recent five positions of the targeted phone; users can tap the position to check it on the map;
- Message, which shows targeted device's latest message details including content and time;
- Lock, which shows the targeted phone's latest locking time and its current locking status;
- Ring, which shows the targeted phone's latest audio playing record;
- Wipe, which shows the latest data erasing of the targeted phone;
- Photographs, which shows the latest 12 pictures on the targeted phone; users can save or delete these pictures;

NOTICE: The operations of Phone Finder require network connections. Therefore, when the device is offline, users can turn on the network connections remotely, which is done through the server by sending a message to the targeted phone and turn on the network. This operation can be executed for 5 times a day at most.

Personalize Center

Tap the Personalize Center icon on the Home Screen to enter the app, which is a collection of wallpapers and themes in different styles provided by MEIZU developers. Tap  on the bottom bar to enter hot themes, which contains 3 categories: 'Selected', 'Top' and 'New'. Tap  on the bottom bar to enter category page which contains 'Style' page and 'Section' page. 3G or WLAN connection will optimize user experience with faster download speed.

Selected

The 'Selected' page contains themes and corresponding reviews carefully selected by editors of Personalize Center.

1. Enter Personalize Center, tap the Hot icon on the bottom bar, and the first page on the left is 'Selected';

2. Selected' page shows outstanding themes recommended by editors;

3. Tap the 'Full Size' or theme preview to see the details of the theme;

4. In theme details page, users can download and share the theme;

5. After downloaded the theme, users can publish rate and reviews in details page.

Paid themes

1. When the button in details page is '¥X', it means this is a paid theme;

Troubleshooting

In case of problems, please refer to this guide. If the problems persist, contact your dealer or visit our website. You can find frequently asked questions and a community forum on our official English website at <http://en.meizu.com>.

Entering PIN

Enter your SIM card PIN code. If you do not know the code, contact your carrier for information.

Entering PUK

After entering the PIN code incorrectly three times, your SIM card will be locked. To unlock, you must enter the PUK code.

Unable to send messages

Please check that the network signal is normal.

No SIM card inserted

Confirm SIM card is properly inserted. Check that the SIM card is working properly as it may be defective or faulty. If so, contact your carrier for a replacement.

Out of service or network failure

Check the signal strength. If there is no network signal, you may be in a network blind spot. Move to another spot to regain signal.

Poor sound quality, echo or noise during conversation

Hang up and dial again.

Short battery life

Where the signal is weak, the phone will constantly be looking for signal, which drains the battery. When you do not need the phone function, you can turn the phone radio off. If the battery has been used for too long, battery life will deteriorate, and battery should be replaced.

Phone does not boot

Check the battery status.

Care tips

In order to improve mobile performance, reduce the radio emission, reduce battery power consumption and ensure safe operation, please observe the following instructions:

How to correctly use the phone:

- 1 Keep the phone and parts and accessories out of children's reach.
- 2 Keep the phone dry and in a ventilated environment when charging. Do not use water, chemicals or cleaning solvents to clean the phone. Also, avoid rain, moisture and liquids that contain minerals that corrode electronic circuit boards.
- 3 Do not attempt unauthorized disassembly of the phone. If you have questions, please contact Meizu or a local Meizu store.
- 4 Do not store the device in extreme temperatures as it can shorten the life of electronic devices and damage the battery. Recommended use environment is between -10 and 5°C.
- 5 Do not drop, knock or strongly shake the mobile phone, as it may result in damage to the internal circuit board.
- 6 If dropped in water, make sure to turn off the mobile and send it to the local Meizu Certified Store immediately for repair. Do not attempt to dry it by using any heating equipment such as dryers, microwave ovens, etc.
- 7 Do not attempt to repair any product at home. If the phone is not working, consult Meizu for after-sales service.
- 8 Prolonged phone calls, web surfing sessions and gaming may result in the phone warming up, especially when charging. This is normal phenomenon among modern smartphones.
- 9 The phone has a built-in antenna. Do not damage or perform unauthorized modifications to the antenna, which may result in reduced equipment efficiency and increased SAR values exceeding the recommended range.
- 10 Do not place heavy objects on, or press hard on the phone, to avoid damage to the phone or its touch screen display.

Mobile security and backup:

The device supports internet connectivity. Like computers, it may be exposed to viruses, malicious information or applications, and other harmful content. Please only open messages, accept connectivity requests, download content and accept installation requests from reliable sources. Please back up important information regularly to prevent the loss of data.

Battery

1. Do not attempt to open the case for the removal or repair mobile phone battery. This product contains a lithium-ion polymer battery. Incorrect installation of battery may lead to fire danger or combustion. Do not disassemble the battery, its external short circuit contacts, expose the battery to extreme temperature (outside of the recommended -10°C to 40°C range), and do not dispose of batteries in a fire as general waste.
2. Please keep the battery and device dry and away from water or other liquids, to avoid short circuiting the device.

* The battery standard: GB/T 18287-2000, limited charge voltage: 4.3V

Please follow the relevant laws and regulations, and do not use the phone in the following environments:

1. Gas stations, chemical storage warehouses, environments containing flammable gas or other chemicals.
2. Hospital operating rooms, emergency rooms, intensive care units and other places. In order to avoid interference with medical devices work, do not use phone.
3. When in an aircraft, follow the aviation safety requirements and turn off your phone when asked to.
4. To protect you and other people's safety while driving, do not use the phone.
5. Do not use phone outdoors during a lightning storm to avoid accidents.
6. When charging the phone, do not use the phone close to your face when calling.
7. Follow any other laws governing mobile phone usage.

Accessory caution

1. Place all accessories (such as SIM or USIM card, power adapter, etc.) out of children's reach to avoid choking hazards.
2. As the mobile phone accessories are not water-resistant, keep all parts dry.
3. When the detaching the power cord of any accessory, pull the plug and not the cord.

Traffic Safety

According to research, texting or talking on the phone while driving significantly increases the fatality risk. Please follow below instructions:

1. If you want to use the phone in the car, use a hands-free device.
2. Make sure your mobile phone and hands-free device do not hinder any vehicle airbags or other safety equipment.

Radio wave radiation safety precautions

1. Avoid using the device in the vicinity of metal structures (such as steel construction sites).
2. Avoid using the device in the vicinity of strong electromagnetic sources, such as microwave ovens, speakers, TV and radios.
3. Use only original manufacturer approved accessories, or those that do not contain any metal parts.
4. Using non-original manufacturer approved accessories may violate your local RF exposure guidelines.

Radio wave (RF) signals

The mobile phone contains a radio transceiver, where the electromagnetic radiation energy does not exceed the upper limit of Chinese regulations. These limits are part of a comprehensive set of guidelines set based on human electromagnetic energy radiation tolerance. These guidelines are set after thorough independent research and are regularly updated and reassessed. These standards include ensure that persons of any age or health status can use the devices safety.

The exposure standard for mobile phones is defined by the electromagnetic energy absorption ratio (Specific Absorption Rate, or SAR) unit of measurement. Based on this model, the maximum allowed SAR value is 2.0W/Kg.

The SAR value is tested in accordance with standard test procedures, such as the use of normal phone positioning, and recording the maximum output power through testing a variety of frequencies. The SAR value is based on the highest measured rate, but general real life mobile use will result in SAR levels well below this maximum. Mobile phones are designed to use power flexibly, and to adjust the the power output to achieve the base station demand level. In general, the closer to the base station the mobile is, the less power it needs.

SAR information

This mobile device meets international guidelines for radio wave exposure. The maximum SAR limit is at a value of 2.0W/Kg, while the measured maximum SAR of this device is 0.174W/Kg, in line with the P.R.C. national standard GB21288-2007, "Limits for human local exposure to electromagnetic fields emitted by mobile phones".

* SAR values may vary by country, region and test environment. The use of accessories may result in different absorption rates.
