1 BECAUSE WE CARE

Thank you for purchasing this product. This product has been designed and assembled with utmost care for you and the environment. This is why we supply this product with a quick installation guide to reduce the amount of paper used and therefore save trees to be cut for making this paper. Thank you for supporting us to protect our environment. You can find the full user guide on **www.aegtelephones.eu**.

2 SAFETY AND PRECAUTIONS

When using your telephone, basic safety precautions should always be followed to reduce the risk of fire, electric shock and injury, including the following:

1. Switch off the phone in the vicinity of chemical plants, gas stations and other locations containing explosive objects.
2. When driving, if you have to make or receive a call, please use a hands free calling device (to be purchased separately) to improve safety. Please park the car on the roadside for communication except in case of emergency.
3. Switch off the phone when boarding an airplane and do not switch the phone on

during the flight, unless the airline specifically allow it.

4. Be careful when using the mobile phone in the vicinity of devices such as pacemakers, hearing aids and other electro-medical equipment, which may be affected by mobile phones.
5. Never attempt to disassemble the phone by yourself.
6. Do not recharge the phone without battery being installed.
7. Charge the phone in well-ventilated environment and keep away from inflammable and highly explosive elements.
8. Keep magnetic discs or credit cards away from the phone to avoid demagnetisation.
9. Keep the phone dry. If soaking occurs, take the battery out and contact the supplier.
10. Avoid using the phone in extreme temperatures and never leave it exposed to direct sunlight, high humidity or a dusty environment.
11. Do not use liquid or anything wet with strong detergents to clean the handset.

2.1 Medical units

The use of equipment that transmits radio signals, e.g. mobile phones, can interfere with insufficiently protected medical apparatus. Consult a doctor or the manufacturer of the apparatus to determine if it has adequate

protection against external radio signals, or if you have any questions. Wherever there are notices to forbid use of mobile phones, you should comply. Hospitals and other health care facilities sometimes use equipment that can be sensitive to external radio signals.

2.2 Pacemaker

Pacemaker manufacturers recommend a distance of at least 15 cm. between a mobile phone and a pacemaker to avoid the risk of interference with the pacemaker. These recommendations are in accordance with independent research and recommendations from Wireless Technology Research. People with pacemakers should:

- not carry the unit in a breast pocket
- hold the unit against the ear on the opposite side from the pacemaker to reduce the risk of interference

If you suspect that there is a risk of interference, turn off the unit and move it further away.

2.3 Areas with explosion risk

Always turn off the unit when you are in an area where there is a risk of explosion and follow all signs and instructions. An explosion risk exists in the places that include areas where you are normally requested to turn off your car engine. Within such an area, sparks can cause explosions or fire which can lead to personal injuries or even death.

Turn off the unit at filling stations i.e. near petrol pumps and garages. Follow the restrictions that are in force on the use of radio equipment near places where fuel is stored and sold, chemical factories and places where blasting is in progress.

Areas with risk for explosion are often, but not always, clearly marked. This also applies to below decks on ships: the transport or storage of chemicals; vehicles that use liquid fuel (such as propane or butane); areas where the air contains chemicals or particles, such as grain, dust or metal powder.

2.4 Emergency calls

Important!

Mobile phones use radio signals and the mobile phone network. This means that connection in all circumstances cannot be guaranteed.

Important Safety Instructions

To prevent possible hearing damage, do not listen at high volume levels for long periods.

3 BOX CONTENT

In the box you will find:

- 1 mobile handset
- 1 earpiece

- 1 main power adapter
- 1 handset back cover
- 1 rechargeable battery pack
- 1 quick start guide

Keep the packing materials in a safe place in case you later need to transport the device.

IMPORTANT

Your handset is not supplied with a SIM card, you will need to insert a SIM card for the handset to work correctly.

4 SET HANDSET LANGUAGE

5.2 Display icons and symbols

The default standby screen shows the following information:

	Meaning
	Meeting sound profile on
	Outdoor sound profile on
	Indoor sound profile on
	New SMS Indicates you have new unread text .
	Missed call
	Radio link (for SIM1 and SIM2) On with signal strength when linked.
	Battery charge level Internal segments cycle during charging.
	Alarm On if alarm is set.
	Silent sound profile on.
	If one or both SIM card not inserted.
	A headset is plugged in.
	Bluetooth is turned on.
	SD card is installed.

6 INSTALLATION AND SETUP

The phone requires a valid 2G type SIM card to work correctly, and can operate with two SIM cards, if required.

Also, a micro-SD card (up to 16GB) can be installed in the handset to allow storage of photos, recordings or other data.

6.1 Install the SIM/SD card and battery

- Switch off the phone, disconnect the power adaptor and remove the battery.
- Remove the backcover by prising open from the bottom right corner.
- Remove the battery by lifting the top in the middle.
- Carefully slide one or both SIM cards into their holders, as shown P1/P2/P3 on page 2, and slide a Micro-SD card, if required, into its holder as shown on page 2.
- Replace the battery by aligning the gold connectors on the battery with those on the phone, and push the battery down until it clicks into place.
- Replace the back cover by placing it flat on the back of the handset and pushing down until it clicks into place.

6.2 Charge the battery

Warning:

Use only supplied/approved battery and charger. Using others may be dangerous and will invalidate approvals or warranty. A battery must be fitted. Do not charge with the back cover removed.

- Connect the charger lead firmly into the micro-USB socket in the bottom edge of the handset.
- Plug the mains power adapter into a mains socket. If the handset is turned on, "**Charger connect**" displays for a few seconds, and the battery symbol bars scroll to indicate that charging has started. If the handset is turned off, a battery symbol appears briefly with the segments cycling to indicate charging has started.
- Charging the battery may take up to 3 hours.
- If "**Charger connect**" does not display, disconnect and retry.
If charging still fails, contact the helpline.
- The battery is fully charged when the bars within the battery symbol are continuously on. Disconnect the charger from the phone and the mains socket. "**Charger removed**" displays briefly to indicate the charging has stopped.

Note:

The phone can also charge from a computer USB port, and transfer files if **USB mass storage** is selected.

6.3 Switching on and off

To switch the phone on and off:

- To switch on, press  and hold until the display turns on.
- To switch off, press  and hold until the display turns off.

Warning:

Do not switch on when mobile phone use is prohibited or if it may cause interference or danger.

6.4 To unlock handset keypad

- To unlock, press **Unlock** then " * ".
- To lock manually, press **Menu** then " * ", or if **Setting>Security>End key locks keypad** is set, just press the **End Call** key.

Note:

When the keypad is locked, you can dial the Emergency Services number 112 or 999, and operate the phone as usual during a call.

7 MAKING AND ANSWERING CALLS

7.1 To make a call

Ensure the phone is switched on and in service.

22 CE DECLARATION

This product is in compliance with the essential requirements and other relevant provisions of the R&TTE directive 1999/5/EC.

The Declaration of conformity can be found on:
www.aegtelephones.eu

23 DISPOSAL OF THE DEVICE

(ENVIRONMENT)

At the end of the product lifecycle, you should not throw this product into the normal household garbage but take it to a collection point for the recycling of electrical and electronic equipment. The symbol on the product, user guide and/or box indicates this. Some of the product materials can be re-used if you take them to a recycling point. By reusing some parts or raw materials from used products you make an important contribution to the protection of the environment.

Please contact your local authorities in case you need more information on the collection points in your area.

Batteries must be removed before disposing of the device. Dispose of the batteries in an environmental manner according to your country regulations.
