Mobile Phone

Operating Instructions

PowerTel M6000

HAC Hearing Aid Compatible to M4 / T4 Rating

The M6000 Phone has a built in Induction Coil and is hearing aid compatible.

To ensure optimum benefit, users with hearing aids may wish to select the T setting on their hearing aids.

Exposure to the receiver at full volume for a long period could cause ear damage.

What is in the box

The box contains:

- 1 mobile phone
- 1 li-ion battery
- 1 desktop charging unit
- 1 power adapter plug
- 1 operating manual

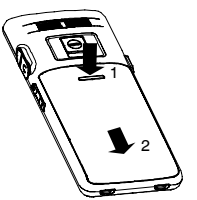
Installing the SIM card and battery

⚠ Risk of swallowing small objects!
The SIM card can be removed.
Small children can swallow them.

Switch the phone off.

⚠ Pay attention that the SIM card is not bent or scratched. Prevent any contact with water, dirt or electrical charges.

Slide the mobile phone's battery compartment cover towards the bottom using a little force. Lift the battery compartment cover off the phone completely.

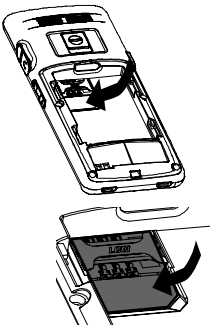


☞ Your telephone number is carried by the SIM card, not the phone. Therefore if you use a SIM card you had in a previous phone, you will keep the same phone number.

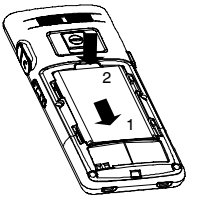
Service-Hotline: 0844 800 6503 (Using an UK landline, at the time of going to print: calls cost 6p for connection charge and then 5p a minute. Mobile costs may vary.)

If there is already a battery inside, remove it.

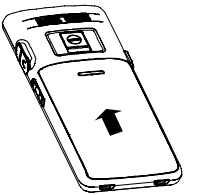
Slide the SIM card with the golden contacts facing down in the moulded SIM card holder. The SIM card must be located under the metal retaining bar to be in the correct position.



Insert the battery. The golden contacts on the battery must face towards the bottom right. Press lightly on the top end of the battery until it snaps into place.



Replace the battery compartment cover back on the phone. Slide the battery compartment cover upwards until it snaps in to place.



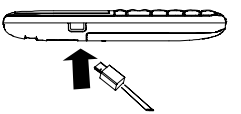
Charging the battery

⚠ Before starting to charge the battery, check that it has been installed properly.
Do not remove the battery while it is being charged. This could damage the phone.

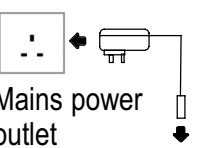
☞ When charging the battery for the first time, it should be charged for **at least** 4 hours. Some batteries only reach their full capacity after several complete charge/discharge cycles.

Charging via the mini USB charging socket

Plug the power adapter in the mini USB charging socket.



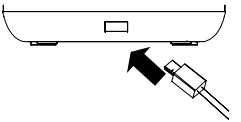
Connect the power adapter plug as illustrated in the diagram. For safety reasons, only use the power adapter plug supplied.



Service-Hotline: 0844 800 6503 (Using an UK landline, at the time of going to print: calls cost 6p for connection charge and then 5p a minute. Mobile costs may vary.)

Charging via the desktop charging unit

Plug the power adapter plug in the mini USB charging socket on the charging unit. Insert the phone in the charging unit to charge it.



☞ The display will go blank but even so the battery is still being charged. This is correct operation.

☞ It may take a few seconds before the phone indicates the charging process.
You can use the phone during the charging process.

When the phone is switched off there is a different view in the display - the charge icon is shown pumping with the red LED.

Battery status warning

The current **battery charge status** is indicated in the display as follows:

Full Half empty Low Empty

When the battery charge is low, a corresponding warning message appears in the display.

☞ Charge the battery.

In cases where the battery charge is extremely low, it is possible that the back-lighting no longer works and certain functions are no longer available.

☞ Charge the battery.

When the battery charge drops below the minimum status, the phone switches off automatically.

Switching the mobile phone on and off

3 sec.	Switch the mobile phone on
3 sec.	Switch the mobile phone off

☞ Some SIM cards will require you to enter a PIN code. Follow the prompts on the screen or read more details about PIN & PIN2 on Page 59.

Make sure you are in range of your Network

Some networks offer better coverage than others in different areas. The icon indicates you have a signal and are connected to the network. The network will also appear in the display.

Service-Hotline: 0844 800 6503 (Using an UK landline, at the time of going to print: calls cost 6p for connection charge and then 5p a minute. Mobile costs may vary.)

Setting the display language

If you want to select a different language please refer to Page 51.

The following languages are available: German, English, French, Spanish, Italian, Dutch, Portuguese, Swedish, Danish, Norwegian, Finnish and Turkish.

Setting the time and date

Refer to Page 50.

Setting the loudest Ringer

Refer to Page 61.

Now you are ready to make and receive calls.

Taking a call

	Take the call

Rejecting a call

	Reject the call

Ending a call

	End the call

Making a call

	Enter the phone number
Clear	Delete the last digit if incorrect
	Dial the phone number

Advanced Settings and Functions

For more details about setting up your Amplicomms M6000 and other functions follow the descriptions in this user guide.

Examples;

- Set your one-touch dialling M1 / M2 / M3 keys; ☞ Page 48.
- Store numbers in the phone book; ☞ Page 27.
- Use the Index; ☞ Page 111.

☞ If you have any questions please call the Service-Hotline: 0844 800 6503 (Using an UK landline, at the time of going to print: calls cost 6p for connection charge and then 5p a minute. Mobile costs may vary.)

Questions and Answers

☞ In the majority of cases your M6000 phone is supplied without a SIM card. You may find the following "**Q**uestions and **A**nswers" (**Q** & **A**) helpful.

Q - Why hasn't the mobile phone been supplied with a SIM card?

A - Many people already have a mobile phone and wish to transfer their existing SIM card over to the new phone. This has the advantage of keeping the same telephone number and if the card is subscribed to a Pay-as-you-go service then you also benefit

from being able to carry over any credit that has been paid the card.

Q - Where can I get a SIM card from?

A - Any high street mobile phone shop will be able to provide you with a SIM card. Some of the major supermarket chains also provide mobile phone services and can supply a SIM card. A useful tip when choosing a SIM card / service provider however is to make sure that you have adequate signal coverage at home; this particularly important if you live in a very rural area.

Q - Why doesn't the Amplicomms mobile phone have a telephone number?

A - The telephone number is supplied by the service provider and will be registered onto the SIM card.

Q - Can I use the SIM card from my old mobile phone?

A - Yes as long as the SIM card is less than three years old you can transfer the card over. Some old SIM cards however are not compatible with the Amplicomms mobile phone as they are from an earlier generation of SIM card design.

Q - Can I use a SIM card from any mobile phone company?

A - Yes. The Amplicomms mobile phone is what is termed as an open SIM card phone and so it is not restricted to any particular service provider or mobile phone company.

Q - How do I pay for my calls?

A - There are two main types of registration with a service provider or mobile phone company. One is a contract - this is where you sign up for agreed contract over several months / year and pay an agreed monthly fee. This is more suited to people who are using their mobile phone as part of their job for example. The other is Pay-as-you-go, sometimes abbreviated to PAYG. With this type of service you add credit to the card and top up as and when required. Topping up the card is easy, you can do this over the phone, on-line, at many shops and even some cash points allow you to do this. PAYG is more suited to less frequent users.

Q - How do I find out my credit balance?

A - The service provider of the SIM card should have provided an information pack with the card. This will give details of a short number to dial in order to check your balance. These access codes differ between mobile phone companies so please check the details specific to your service provider. Key in your number, press the talk button and the credit balance will be announced to you.

3 How does it work

1 Earpiece	The voice of the caller can be heard here when no headset is being worn or the handsfree equipment has not been installed and activated and the device not set to Handsfree mode.
2 Display	The information which appears in the display guides you through the menu structure and helps operate the mobile phone
3 [M1] [M2] [M3] One-touch dialling keys / Softkeys	A phone number can be assigned to each one-touch dialling key and then dialled directly by pressing and holding the respective key. [M1] [M3] are also softkeys. The softkeys are assigned different functions in the various menus. The current function is always indicated by a text directly above the key in the display. [M3] = Initiate key lock

Service-Hotline: 0844 800 6503 (Using an UK landline, at the time of going to print: calls cost 6p for connection charge and then 5p a minute. Mobile costs may vary.)

4 On/Off key, End call key	Switch the mobile phone on and off Cancel the current process End or reject a call Scroll to the right
5 Scroll up / down	Navigate in the menus
6 Hash key	Switch ringing tone on/off, Switch upper/lower case, Key lock
7 Microphone	Is activated during a call
8 Star key	Enter special characters
9 1-0 Keypad	Enter phone numbers and names or write a text
10 Call key	Take a call or dial a number Open the call list Scroll to the left
11 LED	Indicates the phone operating status. The LED will stay on while charging and will flash if no signal is detected or no network to be clamp on to alert the user.
12 Attachment eye	Attachment for Lanyard (not supplied)

13 Mini USB charging socket	To connect the USB charger
14 Charging contacts	The phone is charged via these contacts when in the charging unit
15 Headset socket (Headset not supplied)	Connect a headset. The earpiece, loudspeaker and microphone are deactivated. You can only hear and speak via the headset.
16 [+] [−] Volume control	Regulates the volume of the caller
17 Loudspeaker	You can hear the caller's voice from here when the phone is in Handsfree mode
18 Emergency call switch	Activate emergency call (SOS)
19 Battery compartment cover	Cover of the battery compartment

Service-Hotline: 0844 800 6503 (Using an UK landline, at the time of going to print: calls cost 6p for connection charge and then 5p a minute. Mobile costs may vary.)

Special Functions Keys

Mode	Hold #⚙
Standby	Switched ringer Off / On - Silent Mode

Hold 1

A connection is established to your mailbox and you can play messages recorded; ☞ Page 46.

4 Getting Started

This chapter provides basic information on using the operating instruction manual and the telephone.

Description of operating sequences in the manual

Display	Description
6 MNO	Press the key depicted briefly
2 sec. 7 PQRS	Press the key depicted for 2 seconds
Hold 1	Press and hold down the key depicted
	Enter numbers or letters
	Mobile phone rings
	Remove the phone from the charging unit
	Place the phone in the charging unit
Options	Represents text in the display
E.g.	Indicates icons in the display
OK	Press the softkey; ☞ Page 25

Service-Hotline: 0844 800 6503 (Using an UK landline, at the time of going to print: calls cost 6p for connection charge and then 5p a minute. Mobile costs may vary.)

Standby mode

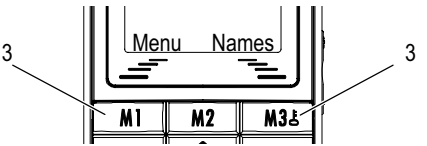
All descriptions in this operating manual assume that the mobile phone is in Standby mode. The system switches to Standby mode by pressing the [⏻] key, several times if necessary. It may be necessary to deactivate the key lock function.

Energy-save mode

When the phone has been in Standby mode for some time, it automatically switches to energy-save mode. The display no longer lights up. Press any key to reactivate Standby mode.

Softkeys

The softkeys [M1] (3) and [M3] (3) are assigned different functions in the different menus. The softkeys are always referred to in this manual according to the texts directly above them in the display.



Key	In Standby mode	In a menu
[M1]	- Open the main menu	- Various functions
[M3]	- Open the phone book - Activate the key lock	- Various functions

Navigating in the menu

All the functions can be accessed via the various menus. Refer to Menu Structure, ☞ Page 84, for information on how to access each respective function.

Menu (M1)	Open the main menu
^ / v	Select the submenu required
OK (M1)	Open the submenu
^ / v	Select the function required
OK	Open the function
^ / v OK	Select the setting required
	Use the keypad to enter numbers or letters
M1 (softkey)	Confirm the entries
M3 (softkey)	Move one level back
	Cancel the programming and saving processes and return to Standby mode

Service-Hotline: 0844 800 6503 (Using an UK landline, at the time of going to print: calls cost 6p for connection charge and then 5p a minute. Mobile costs may vary.)

Creating phone book entries - example

The way in which to navigate through the menus and define settings is explained by means of the example **Creating phone book entries**. Proceed as in this example for all the settings.

Menu	Open the main menu
^ / v Phonebook OK	Select “Phonebook” and confirm it
^ / v Add new contact OK	Select the submenu and confirm it
^ / v To SIM or To phone OK	Select the memory location and confirm it
Name OK OK	Open Edit mode, enter the name and confirm it
^ / v Number OK	Open Edit mode, enter the number and confirm it
Save? Yes or No	Save or reject the entry

How to enter text and numbers

The keypad is also labelled with letters for the entry of text.

The phone provides various methods by which text can be entered. These are used when creating or editing contacts in the phone book, when searching for names in the phone book and when writing SMS text messages.

☞ Not every method is always available for each application.

Entering Text

Multitap

In order to enter text in Multitap mode, press the key labelled with the corresponding letter/character. If the first character of the group is required, press the key once. If the second character is required, press it twice, and so on.

☞ To enter two characters assigned to the same key, press the key the respective number of times to enter the first character. Then wait for approx. 2 sec. and enter the second letter.

Service-Hotline: 0844 800 6503 (Using an UK landline, at the time of going to print: calls cost 6p for connection charge and then 5p a minute. Mobile costs may vary.)

ABC	Multitap upper case
abc	Multitap lower case
123	Numbers

☞ To switch between the text and numbers, press the [#] key.

Punctuation and special characters

When entering text, press the [*] key. Punctuation marks and special characters are displayed. Use the [^] / [v] keys to select the required character and insert it by pressing the OK softkey. To enter a space, press the [0] key.

5 Phone Book Set Up

The phone book in the phone can store up to 500 entries.

- Always enter the area code with all the phone numbers.
- When the memory capacity is used up, the corresponding message appears when an attempt is made to store another entry. Before new entries can be stored, old entries must be deleted.
- The phone book entries are arranged alphabetically. To skip directly to a required phone book entry, press the corresponding first letter. To search for the entries manually, use the ^ / v keys.

☞ Your provider can state how many entries you can store on your SIM card.

Service-Hotline: 0844 800 6503 (Using an UK landline, at the time of going to print: calls cost 6p for connection charge and then 5p a minute. Mobile costs may vary.)

Entering names

The keypad is also labelled with letters for the entry of names. Press the corresponding key the respective number of times to enter letters. Information on ways of entering text; ☞ Page 28.

0–	Enter a space
Clear	Delete
◁ / ▷	Move the cursor to left or right

Creating phone book entries

Refer to Page 27.

Saving in Standby mode

	Enter the phone number
Save	Open the menu
△ / ▽ To SIM or To phone OK	Select the memory location and confirm it
Edit OK Done	Open Edit mode, enter the name and confirm it
△ / ▽ Number OK	Open Edit mode, edit the number and confirm it

Save? Yes or No

Save or reject the entry

Modifying, editing, deleting phone book entries

Names — Open the phone book

Search for the required entry as described at the beginning of this chapter.

OK — Open the menu

The following functions can also be used:

Call	Dial the entry
View	View the entry
Edit	Edit the entry
Delete	Delete the entry
Copy	Copy the entry (SIM ↔ phone)
Move	Move the entry (SIM ↔ phone)

Execute the functions and then confirm them.

Editing or deleting all entries

Menu — Open the main menu

[^] / [v] Phonebook OK

Select “Phonebook” and confirm it

Service-Hotline: 0844 800 6503 (Using an UK landline, at the time of going to print: calls cost 6p for connection charge and then 5p a minute. Mobile costs may vary.)

The following functions can also be used:

Copy all	Copy all the entries (SIM or phone)
Delete all	Delete all the entries (SIM or phone)

Execute the functions and then confirm them.

Settings

Menu	Open the main menu
^ / v Phonebook OK	Select “Phonebook” and confirm it
^ / v Phonebook settings OK	Select the menu and confirm it

The following functions are available

Extra numbers	View the additional numbers (e.g. own phone number)
Memory status	The status of the SIM and phone memory is displayed
Preferred storage	Select your preferred storage medium (SIM or phone)

6 Making and Receiving Calls

Taking a call

	Take the call

Rejecting a call

	Reject the call

Ending a call

	End the call

Making a call

	Enter the phone number
Clear	Delete the last digit if incorrect
	Dial the phone number

Call list

Your mobile phone stores the last phone numbers dialled (**redialling**), calls **received** and **missed calls** in a call list.

	Open the calls list
/	Select the entry and dial it

Dialling numbers from the phone book

Phone numbers must have been stored in the phone book for this function; ☞ Page 27.

Names	Open the phone book
/	Select the entry and dial it

Service-Hotline: 0844 800 6503 (Using an UK landline, at the time of going to print: calls cost 6p for connection charge and then 5p a minute. Mobile costs may vary.)

One-touch dialling keys

You must have already assigned phone numbers to the one-touch keys; ☞ Page 48.

3 sec. M1, M2 or M3	Press the key

Setting the receiver volume

The volume can be adjusted during a call.

+ or −	Select the required volume

Exposure to the receiver at full volume for a long period could cause ear damage.

Talk time display

The duration of a call is displayed in hours, minutes and seconds during the call.

Handsfree

This function is used to listen to the caller via the loudspeaker.

Speaker	Activate the handsfree facility
H-Held	Deactivate the handsfree facility

Muting the microphone in the handset

The microphone in the handset can be activated and deactivated during a telephone conversation.

Options	Open the menu
^ / v Mute	
On	Deactivate the microphone (muting function activated)
Off	Activate the microphone

Keypad lock

The keypad lock is intended to prevent functions being triggered unintentionally.

M3 and then # immediately
Activates the key lock function

☞ Calls can still be taken in the normal way even when the key lock function is activated.

M3 and then # immediately
Deactivates the key lock function

Turn ringer Off/On

The ringer can be set to silent - vibrate only.

3 sec. #	Switch the ringer off
3 sec. #	Switch the ringer on

When you have set the ringer ”Off” you will notice this icon in the display.

Service-Hotline: 0844 800 6503 (Using an UK landline, at the time of going to print: calls cost 6p for connection charge and then 5p a minute. Mobile costs may vary.)

Options during a call

Options — Open the “Options” menu

This menu provides access to functions which can be executed during a call:

Hold

▲ / ▼ Hold single call OK

Put the current call on hold

☞ When a call is put on hold, the menu option changes to “Retrieve single call“.

To retrieve the call put on hold

▲ / ▼ Retrieve single call OK

Resume the call

New call

▲ / ▼ New call OK

Select the function

Enter the phone number and dial it

☞ The first call is put on hold.

Phone book

▲ / ▼ Phonebook OK

Open the phone book

Muting function

▲ / ▼ Mute On

7 Call Lists

The mobile phone is equipped with a calls list.
Your mobile stores the last phone numbers dialled, taken and received but missed.

☞ If one of the phone numbers received matches an entry in the phone book, the associated name appears.

The following icons appear to indicate

numbers dialled

calls received

missed calls

Dialling from the calls list

	Open the calls list
/	Select an entry and dial it

Service-Hotline: 0844 800 6503 (Using an UK landline, at the time of going to print: calls cost 6p for connection charge and then 5p a minute. Mobile costs may vary.)

Displaying list details

Open the calls list.

^ / v OK	Select an entry and display details
Options	Open the Options menu

The following functions are available:

Delete	Delete the entry
Save to Phonebook	Save the entry (SIM or phone)
Call	Dial the entry
Send text message	Send the text message

Execute the functions and then confirm them.

8 SMS - Text Messages

☞ It is possible that not all functions described are supported by every network. Therefore, please contact your local mobile phone provider for details.

SMS settings

☞ Text messages are distributed via a Service Centre. If you want to send and receive SMS text messages, you must program a service centre number in your mobile phone. Normally, this has already been set up by your service provider.

Navigate to the “SMS settings” menu.

Menu	Open the main menu
^ / v Messages OK	Select the menu and confirm it
^ / v SMS settings OK	Select the menu and confirm it

Service-Hotline: 0844 800 6503 (Using an UK landline, at the time of going to print: calls cost 6p for connection charge and then 5p a minute. Mobile costs may vary.)

Profile settings

Navigate to the “SMS settings” menu.

/ Profile settings OK

Select the menu and confirm it

/ Profile 1 or Profile 2 Edit

Select a profile and confirm it

The following functions are available:

Profile name	Edit the profile name
SMSC address	Edit the SMS Service Center number
Validity period	Define the period of validity

You can use this feature to define how long an attempt should be made to deliver a message which you have sent.

Message type	Set the type of message

Execute the functions and then confirm them.

General settings

Delivery report

Select “Delivery report - On” to receive the corresponding delivery confirmation report that a message sent has been received.

Reply path

Select “Reply path - On” to send the reply path of your provider with an SMS message. Contact your provider for further details.

Navigate to the “SMS settings” menu.

▲ / ▼ Common settings	OK
	Select the menu and confirm it

Delivery report	Switch on or off
Reply path	Switch on or off

Memory status

Navigate to the “SMS settings” menu.

▲ / ▼ Memory status	OK
	Select the menu and confirm it

☞ The memory locations occupied and free on the both the mobile phone and SIM card are displayed.

Service-Hotline: 0844 800 6503 (Using an UK landline, at the time of going to print: calls cost 6p for connection charge and then 5p a minute. Mobile costs may vary.)

Writing an SMS text

☞ A text message can contain up to 457 characters, including spaces. A standard message contains 160 characters. Additional costs may ensue in the case of messages containing more than 160 characters.

Menu — Open the main menu

/ Messages OK

Select the menu and confirm it

 / Write message OK

Select the menu and confirm it

 — Write the text.

☞ Information on ways of entering text; ☞ Page 28.

Options — Open the menu

Insert templates OK

Done OK

The following functions are available

Send only OK

 or Search — Enter the number or select from the phone book.

Save and send OK	Enter the number or select from the phone book. The SMS text is saved in the “Outbox” folder and sent to the number dialled.
Save OK	The SMS text is saved in the “Outbox” folder.
Send to many OK	The message can be sent to several recipients selected from the phone book.

Execute the functions and then confirm them.

SMS text messages sent and received

☞ Texts received are indicated by a ringing tone which you have set. A message appears in the display. Press the “Read“ softkey to display the message.

SMS texts received are stored in the “Inbox” folder.

SMS texts sent are saved in the “Outbox” folder as are the drafts.

Service-Hotline: 0844 800 6503 (Using an UK landline, at the time of going to print: calls cost 6p for connection charge and then 5p a minute. Mobile costs may vary.)

Editing stored texts

Menu	Open the main menu
^ / v Messages OK	Select the menu and confirm it
^ / v Inbox / Outbox OK	Select the menu and confirm it
^ / v OK	Select SMS and confirm it
Options	Open the menu

The following functions are available:

Reply	Reply to the number from which the text was sent
Delete	Delete the SMS text
Forward	Forward the text to a different number
Copy to phone / Copy to SIM	Copy the SMS text
Move to phone / Move to SIM	Move the SMS text
Use number	Use the number from which the text was sent

Execute the functions and then confirm them.

9 Voice Mail

☞ It is possible that not all functions described are supported by every provider. Therefore, please contact your local mobile phone provider for details. They may concern services which are subject to charges.

In order to use the “Voice Mail”[1] feature, the relevant phone number must be programmed in your mobile phone. Normally, this has already been set up by your service provider.

Setting up the Voice Mail feature

Menu	Open the main menu
⌃ / ⌄ Messages OK	Select the menu and confirm it
⌃ / ⌄ Voicemail server OK	Select the menu and confirm it
⌃ / ⌄ <Empty> Options	Select a Voicemail server and open options
⌃ / ⌄ Edit OK	Select the menu and start editing

[1] Voice Mail, also referred to as mailbox (answering machine in mobile telecommunication network)

Service-Hotline: 0844 800 6503 (Using an UK landline, at the time of going to print: calls cost 6p for connection charge and then 5p a minute. Mobile costs may vary.)

▲ / ▼ Name Edit Done

Open Edit mode, enter the name and confirm it

▲ / ▼ Number OK

Open Edit mode, edit the number and confirm it

Save?, Yes or No

Confirm or cancel changes

The following function is also available in the "Voicemail server" option.

Call voicemail OK

The Voice Mail number is dialled

Execute the functions and then confirm them.

Playing the Voice Mail messages

Navigate to the "Call voicemail" menu option, as previously described, and press the OK softkey or Hold 1

A connection is established to your "Voice Mail" and you can play messages recorded.

10 Other Useful Features

One-touch dialling keys

It is possible to assign phone numbers to the one-touch dialling keys M1, M2 or M3 which are then dialled directly by pressing and holding the corresponding key; ☞ Page 35.

☞ Each number you want to define as a one-touch dialling number must be stored in the phone book.

Assigning a phone number to a one-touch dialling key:

Menu	Open the main menu
^ / v Phonebook OK	Select the menu and confirm it
^ / v Set M1/M2/M3 OK	Select the menu and confirm it
^ / v [ ] Edit	Select the one-touch dialling key and confirm it

Select

View	To display the number
Change	To edit a phone number in the phone book

Service-Hotline: 0844 800 6503 (Using an UK landline, at the time of going to print: calls cost 6p for connection charge and then 5p a minute. Mobile costs may vary.)

Delete	To delete the number assigned

Execute the functions and then confirm them.

Speed dialling

Phone numbers can be assigned to the keypad 2 to 9. Then hold the corresponding key pressed longer than 3 seconds to dial the corresponding number.

☞ Each number you want to define as a speed dial number must be stored in the phone book.

Menu	Open the main menu
^ / v Phonebook OK	Select the menu and confirm it
^ / v Speed dial OK	Select the menu and confirm it
^ / v Status On	Activate speed dialling
^ / v Set number OK	Select the menu and confirm it

SMTWTFS / Select a day

S = Sunday, **M** = Monday, **T** = Tuesday, **W** = Wednesday, **T** = Thursday, **F** = Friday, **S** = Saturday

On or Off Select whether the alarm is active or not this day

Configure the other days for your preferred situation.

☞ Active days are highlighted with a frame.

Jump to Snooze

Snooze (min) / , Select between “1” to “10” minutes and jump to Alert type

Alert type / , Done Select “Vib. and ring”, “Ring only” or “Vib. only” and confirm it

Save? , Yes or No Confirm or cancel changes

Other Useful Features

Calculator

This feature provides a simple calculator feature with which to solve simple basic calculations.

Use the ^ and v keys to select the required arithmetic operation (+, -, x, ÷).

Use the # key to set a decimal point.

Use the * key to change the sign (±).

Menu	Open the main menu
^ / v Extra	OK
	Select the menu and confirm it
^ / v Calculator	OK
	Select the menu and confirm it

Example

To execute the calculation " -5 x 2.5 " you have to type the following keys;

5 * = -5

^ ^ ^ = x

2 # 5 = 2.5

OK = -12.5

Clear = Delete

Service-Hotline: 0844 800 6503 (Using an UK landline, at the time of going to print: calls cost 6p for connection charge and then 5p a minute. Mobile costs may vary.)

Tone Control

Users of hearing aids and non users will appreciate this unique feature. The Phone is delivered with the Tone Control set in the normal position and there are two additional options available;

- Low Frequency setting
- High Frequency setting

Menu — Open the main menu

◠ / ◡ Settings OK — Select the menu and confirm it

◠ / ◡ Tone control OK — Select the menu and confirm it

◠ / ◡ Normal, Low frequency or High frequency OK — Select a setting and confirm it

Select your preferred frequency that provides the best hearing experience.

Network settings

Network selection: This menu can be used to select mobile telecommunication networks other than your own mobile network provider. However, the corresponding agreements must have been concluded.

Preferences: You can select and edit the mobile telecommunication networks prescribed on the SIM card. Use the ▲ / ▼ keys to change the priority.

☞ It is possible that not all functions described are supported by every provider. Therefore, please contact your local mobile phone provider for details.

Menu	Open the main menu
▲ / ▼ Settings	OK Select the menu and confirm it
▲ / ▼ Network settings	OK Select the menu and confirm it

Network selection or Preferences

Refer to Menu Structure; ☞ Page 93.

Service-Hotline: 0844 800 6503 (Using an UK landline, at the time of going to print: calls cost 6p for connection charge and then 5p a minute. Mobile costs may vary.)

Security settings

This menu is used to define which functions on the phone or SIM card should be protected by a password/PIN. The PIN and password can be changed.

☞ PIN and PIN2 are supplied together with the SIM card. Further information is available from your SIM card service provider.

Menu — Open the main menu

[^] / [v] Settings OK — Select the menu and confirm it

[^] / [v] Security settings OK — Select the menu and confirm it

SIM lock

☞ The PIN is supplied together with the SIM card. If you deactivate the SIM lock, you need not enter the PIN after switching the mobile phone on.
It is recommended to leave the SIM lock on to prevent unauthorised persons from using the mobile phone.

Phone lock

☞ The default setting for the password is 1234. If this lock is active, you must first enter the password for the phone lock after switching the mobile phone on and then enter the PIN.

Change password — Change the passwords/PIN

Refer to Menu Structure; ☞ Page 94.

Tips

Locking your phone with your own personal PIN. You can lock your mobile phone to prevent unauthourised use by setting up a personal PIN number.

Menu	Open the main menu
⌃ / ⌄ Settings OK	Select the menu and confirm it

Select the menu and confirm it

▭ / ▭ Inquiry audio device OK

Select the menu and confirm it

☞ Please refer to the manual supplied with your Bluetooth® headset for instructions on how to set the Bluetooth® headset to pairing mode.

▭ / ▭ Pair — Select the device and establish a connection

0000 OK — Enter the PIN and confirm it

☞ The PIN required is stipulated in the manual supplied with your Bluetooth® headset.

After the devices have been successfully paired, further functions are available for selection;
☞ Page 97.

☞ Please refer to the manual supplied with your Bluetooth® headset for information on using the headset for phoning.

12 Emergency Call Function

This mobile phone is equipped with a convenient emergency call function. Up to 5 phone numbers can be entered for emergency calls. For this function to work correctly it is necessary to record your personal message. See section below Page 76 Recording an SOS message.

Entering/Deleting emergency call numbers

Proceed as follows to define an entry in the phone book as an emergency call number.

☞ Each number you want to define as an emergency call number must be already stored in the phone book.

Menu	Open the main menu
^ / v Settings OK	Select the menu and confirm it
^ / v Help Setting OK	Select the menu and confirm it
^ / v SOS setting OK	Select the menu and confirm it
^ / v Set SOS numbers OK	Select the menu and confirm it

Service-Hotline: 0844 800 6503 (Using an UK landline, at the time of going to print: calls cost 6p for connection charge and then 5p a minute. Mobile costs may vary.)

^ / v [ ] Options	Select a memory location and open the options
^ / v Change OK	Select the function and confirm it
^ / v OK	Select entry and confirm it

The following functions can also be used:

View	View the entry
Delete	Delete the entry

Sending an emergency call

You can define whether an emergency call should only be sent to the numbers entered in “Set SOS numbers” or to a specific call centre.

Menu	Open the main menu
^ / v Settings OK	Select the menu and confirm it
^ / v Help Setting OK	Select the menu and confirm it
^ / v SOS setting OK	Select the menu and confirm it
^ / v SOS mode setting OK	Select the menu and confirm it

/ Set 5 numbers or
Set call centre or Off OK
Select the mode and confirm it

Setting up a call centre number

Proceed as follows to set up a number.

Menu	Open the main menu
/ Settings OK	Select the menu and confirm it
/ Help Setting OK	Select the menu and confirm it
/ SOS setting OK	Select the menu and confirm it
/ Set call centre number OK	Select the menu and confirm it
OK	Edit the number and confirm it

Recording an SOS message

When you make an emergency call, a message is sent. It is important for the person being called to understands that to accept this emergency call they need to press the “0” key. The M6000 will switch to hands free and the called party can listen in and have a conversation. The maximum length of this message is 15 seconds. We suggest the typical voice message should contain the following;

Service-Hotline: 0844 800 6503 (Using an UK landline, at the time of going to print: calls cost 6p for connection charge and then 5p a minute. Mobile costs may vary.)

This is ... **your name** ...

I need assistance - please press zero to accept my call.

Menu	Open the main menu
^ / v Settings OK	Select the menu and confirm it
^ / v Help Setting OK	Select the menu and confirm it
^ / v Record SOS message OK	Select the menu and confirm it
Options ^ / v Record OK	Start recording
Stop	Speak your message into the microphone and confirm it
Save audio? Yes / No	Save or reject the recording

The following functions can also be used:

Play	Play the message
Delete	Delete the message

Emergency Call Function

Fall Down Alarm - Please read carefully

The innovative and sophisticated sensor built into your telephone will function reliably, provided your telephone is always hung round your neck with a lanyard which can be purchased in any telephone shop. Should you fall, it will trigger your alarm and make the calls you have programmed without your having to locate your telephone and press the alarm key. In case the alarm is triggered inadvertently, simply press the alarm key up and down to cancel. You can choose to set the M6000 to normal or sensitive mode. This function should not be the sole method of seeking assistance.

When fall down is on you will see this icon in the display of the phone.

⚠ If it is your intention to carry your telephone in your pocket, briefcase, or bag, false alarms may occur and you may prefer to switch the fall down sensor off as instructed.

☞ False alarms to emergency call centres can result in considerable costs which could then be charged to you. Therefore, treat this function with due care and attention.

Menu	Open the main menu
^ / v Settings OK	Select the menu and confirm it

Service-Hotline: 0844 800 6503 (Using an UK landline, at the time of going to print: calls cost 6p for connection charge and then 5p a minute. Mobile costs may vary.)

/ Help Setting OK
Select the menu and confirm it

/ Man down SOS OK
Select the menu and confirm it

/ Normal or Sensitive OK
Select the sensitivity and activate the function

or

/ Off OK Deactivate the function

Emergency Call Function, Examples

The emergency call function is explained here according to two examples.

Emergency calls to an emergency call centre

☞ False alarms to official emergency call centers can result in considerable costs which could then be charged to you.

☞ It may be necessary for you to register with an emergency call centre. Ask your doctor or community services for details.

Carry out the following settings:

Menu Open the main menu

/ Settings OK
Select the menu and confirm it

Emergency Call Function

/ Help Setting OK	Select the menu and confirm it
/ SOS setting OK	Select the menu and confirm it
/ Set call centre number OK	Select the menu and confirm it
OK	Edit the number and confirm it
/ SOS mode setting OK	Select the menu and confirm it
/ Set call centre OK	Select the mode and then confirm it

In the case of an emergency call:

The phone dials the emergency call centre number. When a connection is established, the SOS message you recorded is sent. The connection then remains active for approx. 10 seconds. If the number of the emergency call centre is “engaged”, up to three further attempts are automatically made to dial the number.

Emergency call to several numbers

The required phone numbers must be stored in the phone book (relatives/friends).

Carry out the following settings:

Service-Hotline: 0844 800 6503 (Using an UK landline, at the time of going to print: calls cost 6p for connection charge and then 5p a minute. Mobile costs may vary.)

Menu — Open the main menu

/ Settings OK — Select the menu and confirm it

/ Help Setting OK — Select the menu and confirm it

/ SOS setting OK — Select the menu and confirm it

/ Set SOS numbers OK — Select the menu and confirm it

/ Options — Select a memory location and open the options

/ Change OK — Select the function and confirm it

/ OK — Select entry and confirm it

After up to 5 emergency numbers have been set

Back

/ SOS mode setting OK — Select the menu and confirm it

/ Set 5 numbers OK — Select the mode and then confirm it

Emergency Call Function

In the case of an emergency call:

The phone dials the 1st emergency call number. When a connection is established, the SOS message you recorded is sent. The connection then remains active for approx. 10 seconds before the next number is dialled. If a phone number is "engaged" or an answering machine takes the call, the mobile phone automatically dials the next emergency call number (after approx. 1-2 minutes).

When the called party receives your emergency call they will hear your recorded voice message and must accept the call by pressing 0. Your Emergency call is now in hands free mode. Remember to switch the emergency call switch off.

Starting the emergency call

Slide the **emergency call switch** upwards. A siren is sounded. The phone dials the set number. Depending on the settings selected, the number is redialled or the next number is dialled.

Ending the emergency call

After making the call or to cancel the emergency call, slide the **Emergency call switch** back down.

Terminating the "man down" SOS

If the function is triggered unintentionally, slide the **Emergency call switch** up and then immediately back down again.

Service-Hotline: 0844 800 6503 (Using an UK landline, at the time of going to print: calls cost 6p for connection charge and then 5p a minute. Mobile costs may vary.)

13 Services

This menu contains the SIM Application Toolkit (commonly referred to as STK) of your mobile phone provider. The content and functions available vary from provider to provider and are dependent on the SIM card used.

SIM Application Toolkit (STK) is a GSM system standard which enables the SIM to initiate actions which can be used for various value-added services.

☞ Please contact your local mobile phone provider for details. They may concern services which are subject to charges.

14 Menu Structure

Service hotline

Should problems arise with the telephone, please refer to the following information first. In the event of technical problems, please contact out service hotline under tel. 0844 800 6503 (Using an UK landline, at the time of going to print: calls cost 6p for connection charge and then 5p a minute. Mobile costs may vary.) In the case of claims under the terms of guarantee, contact your sales outlet. There is a 2 year period of guarantee.

Problems and solutions

Problems	Solutions
The mobile phone cannot be switched on.	- No battery inserted. - Battery is not charged.
The display is “locked” when the mobile is switched on.	- Enter the PUK to “unlock” the SIM card. Contact your service provider.
A message appears in the display for some functions, indicating execution/use is not possible.	- Many functions can only be used after the respective service has been applied for. Contact your service provider.

No signal quality is displayed.	- No network connection. The mobile phone is in a location where there is no network service. Move to a different location or contact your service provider.
Keypad does not function or only functions very slowly.	- The operating speed of the display is reduced in the case of low temperatures. This is normal. Use the phone in a warmer location.
Screen frozen or no response when pressing keys.	- Remove the battery for 3 minutes and try again.
No connection to the mobile telecommunication network.	- Contact your service provider.
The “Insert SIM” message appears in the display.	- Ensure that the SIM card has been installed correctly. Contact your service provider, if necessary.

The battery cannot be charged or is empty within a short time.	- Battery is defect. - Place the phone correctly in the charging unit or connect the charging unit properly. Clean the contact surfaces on the mobile phone and charging unit with a soft, dry cloth. - Charge the mobile for 4 hours.

Tips on the battery

Only use batteries, cables and charging unit approved by the manufacturer, otherwise the battery could be damaged.

Do not short circuit the battery. Always leave the battery in the phone to avoid accidentally short circuiting the battery contacts.

Keep the battery contacts clean and free of dirt.

The battery can be charged/discharged hundreds of times but its service life is limited. Replace the battery when the battery power has decreased noticeably.

Service-Hotline: 0844 800 6503 (Using an UK landline, at the time of going to print: calls cost 6p for connection charge and then 5p a minute. Mobile costs may vary.)

Declaration of Conformity

This device fulfils the requirements stipulated in the EU directive:
1999/5/EU directive on radio equipment and telecommunications terminal equipment and the mutual recognition of their conformity.
Conformity with the above mentioned directive is confirmed by the CE mark on the device.
To view the complete Declaration of Conformity, please refer to the free download available on our web site www.amplicomms.eu.

CE 1588

Service-Hotline: 0844 800 6503 (Using an UK landline, at the time of going to print: calls cost 6p for connection charge and then 5p a minute. Mobile costs may vary.)

SAR Information

Information on radio frequency emissions and specific absorption rates (**SAR** = **S**pecific **A**bsorption **R**ate).

All the applicable safety standards related to radio frequency emissions were implemented during the development of this mobile phone. The limit values are based on scientific directives and contain a safety margin in order to guarantee the safety of all persons regardless of age and state of health.

The values specified in the directive concerning radio frequency emissions are based on a unit called SAR. SAR values are established using standard methods in which the phone is operated in all possible frequency bands with the highest power output.

Although the SAR values of various phone models can differ, all the models were developed to maintain the relevant directives on radio frequency emissions.

The following information applies to residents of countries which, as with the European Union, have adopted the SAR limit value recommended by the ICNIRP (**I**nternational **C**ommission on **N**on-**I**onizing **R**adiation **P**rotection) which lies at 2W/Kg (averaged from 10 gram tissue):

The highest SAR value measured, averaged over 10 g tissue, was < 0.422 W/kg for this mobile phone measured at the ear.

17 Safety Information

Please read this section carefully.

Risk of suffocation!
Keep packaging materials and protective foils out of reach of children.

Intended use

This mobile phone is designed for use when connected to a mobile phone network. Any other use is considered unintended use. Unauthorised modification or reconstruction is not permitted. Under no circumstances open the device or complete any repair work yourself.

Areas of use

- Do **not** use the phone in prohibited areas.
- Switch the phone off in the vicinity of medical equipment (e.g. in hospitals).
- Do not use the phone in petrol stations or near fuels and chemicals.
- Check with the airline whether mobile phones may be used on board.

Service-Hotline: 0844 800 6503 (Using an UK landline, at the time of going to print: calls cost 6p for connection charge and then 5p a minute. Mobile costs may vary.)

General information

- Prevent exposure to smoke, dust, vibration, chemicals, moisture, heat and direct sunlight. The phone is not waterproof; therefore, keep it dry.
- Only use original accessories and batteries. Never attempt to connect other products.
- If you want to connect the phone to another device, read the manual supplied with that device with regard to any detailed safety information. Never attempt to connect incompatible products.
- Repairs to this device may only be completed by qualified service personnel.
- All mobile communication equipment is subject to interference which may impair its performance.
- Keep the phone and accessories out of the reach of children.
- The SIM card can be removed. Caution! Small children can swallow them.
- The ringing tone is issued via the loudspeaker. Take an incoming call first and then hold the phone to your ear.
  This prevents any possible hearing damage.

Safety Information

- Only use the phone while driving or riding a transport vehicle in road traffic when using the approved handsfree equipment and appropriately positioned holders. Ensure that no safety-related functions are interfered with when operating the phone. It is essential to observe the applicable national laws and regulations.
- Always maintain a distance of at least 15 cm to implanted heart pacemakers to prevent any possible interference. If you have had a pacemaker implanted, do not carry the phone in a breast pocket when switched on. Always hold the phone to the ear furthest away from the pacemaker during calls.
  Switch the phone off immediately if you notice or suspect any adverse effects.
- This phone is hearing aid compatible. If you wear a hearing aid, however, please contact your doctor or the hearing aid manufacturer to inquire about any possible impairments through mobile communication equipment.
- Do not rely on the mobile phone as a safeguard for emergencies. For a variety of technical reasons, it is not possible to guarantee a reliable connection under all circumstances.

Service-Hotline: 0844 800 6503 (Using an UK landline, at the time of going to print: calls cost 6p for connection charge and then 5p a minute. Mobile costs may vary.)

Power adapter plug

Attention: Only use the power adapter plug supplied because other power supplies could damage the phone. Ensure access to the power adapter plug is not obstructed by furniture or such.

The power adapter plug supplied fulfils the ecodesign requirements of the European Community (Directive 2005/32/EC). This means that the current consumption is considerably less, both in operation as well as in standby, in comparison to older power adapter plug models.

Rechargeable batteries

Attention: Never throw batteries into a fire. Only use batteries of the same type.

Barcode labels on the phone

The barcode label contains information on the phone, such as the serial number, for example. Do not remove it.

Disposal

In order to dispose of your device, take it to a collection point provided by your local public waste authorities (e.g. recycling centre). According to laws on the disposal of electronic and electrical devices, owners are obliged to dispose of old **electronic and electrical devices** in a separate waste container. The symbol indicates that the device must not be disposed of in normal domestic waste!

Batteries represent a hazard to health and the environment!

Never open, damage or swallow batteries or allow them to pollute the environment. They may contain toxic, ecologically hazardous heavy metals. You are legally obliged to dispose of power packs and batteries at the point of sale or in the corresponding containers provided at collection points by local public waste authorities. Disposal is free of charge. The symbols indicate that the batteries must not be disposed of in normal domestic waste and that they must be brought to collection points provided by local public waste authorities.

Packaging materials must be disposed of according to local regulations.

Service-Hotline: 0844 800 6503 (Using an UK landline, at the time of going to print: calls cost 6p for connection charge and then 5p a minute. Mobile costs may vary.)

18 Maintenance / Guarantee

Maintenance

- Clean the housing surfaces with a soft, fluff-free cloth.
- Do not use any cleaning agents or solvents.

Guarantee

AMPLICOMMS equipment is produced and tested according to the latest production methods. The implementation of carefully chosen materials and highly developed technologies ensure trouble-free functioning and a long service life. The terms of guarantee do not apply when a device malfunction was caused by the mobile telecommunications network operator/provider. The terms of guarantee do not apply to the batteries or power packs used in the products. The period of guarantee is 24 months from the date of purchase.

All deficiencies related to material or manufacturing errors within the period of guarantee will be redressed free of charge. Rights to claims under the terms of guarantee are annulled following tampering by the purchaser or third parties.

Maintenance / Guarantee

Damage caused as a result of improper handling or operation, normal wear and tear, incorrect positioning or storage, improper connection or installation or Acts of Gods and other external influences are excluded from the terms of guarantee. In the case of complaints, we reserve the right to repair defect parts, replace them or replace the entire device. Replaced parts or devices become our property. Rights to compensation in the case of damage are excluded where there is no evidence of intent or gross negligence by the manufacturer.

If your device shows signs of defect during the period of guarantee, please return it to the sales outlet in which you purchased the AMPLICOMMS device together with the purchase receipt. All claims under the terms of guarantee in accordance with this agreement can only be asserted at the sales outlet. No claims under the terms of guarantee can be asserted after a period of two years from the date of purchase and hand-over of the product.

Service-Hotline: 0844 800 6503 (Using an UK landline, at the time of going to print: calls cost 6p for connection charge and then 5p a minute. Mobile costs may vary.)

Notes

Important Notes on the Guarantee

The period of guarantee for the AMPLICOMMS product begins on the date of purchase. Rights to claims under the terms of guarantee relate to deficiencies resulting from material or production faults. Rights to claims under the terms of guarantee are annulled following intervention by the purchaser or third parties. Damage caused as a result of improper handling or operation, normal wear and tear, incorrect positioning or storing, improper connection or installation, Acts of God or other external influence are not covered by the terms of guarantee.

CLAIMS UNDER THE TERMS OF GUARANTEE MAY ONLY BE ASSERTED TO THE RETAILER WHERE THE EQUIPMENT WAS PURCHASED, WHEREBY THE PURCHASE RECEIPT MUST ALSO BE SUBMITTED.

TO PREVENT UNNECESSARY LONG DELAYS, PLEASE DO NOT SEND EQUIPMENT UNDER COMPLAINT TO OUR OFFICE ADDRESS.

IN THE CASE OF QUESTIONS CONCERNING OPERATION OR THE TERMS OF GUARANTEE, PLEASE REFER TO THE OPERATING MANUAL OR CONTACT OUR HOTLINE: 0844 800 6503
(Using an UK landline, at the time of going to print:
calls cost 6p for connection charge and then 5p a minute.
Mobile costs may vary.)
