

en

Caution: before using your phone, please read the safety, regulatory and legal information provided with your product.

## At a glance

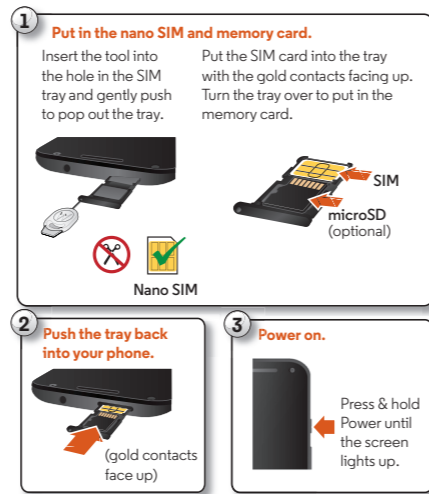

Let's get started. We'll guide you through startup and tell you a bit about your phone's features.

**Note:** software updates happen frequently, so your phone may look a little different.

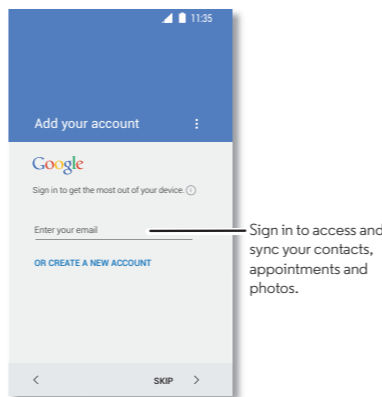

## Put in the cards & power on

**Caution:** make sure you use the correct size SIM card, don't cut the SIM card, don't use an adapter with your SIM card and don't bend the SIM tray when inserting/removing the SIM card. Use the SIM tool to remove the card from the tray.

## Sign in

Just follow the screen prompts to get started. If you use Gmail™, you already have a Google™ account — if not, you can create an account during setup. Signing in to your Google account lets you access, sync and back up your stuff. See your Google apps, contacts, calendar, photos and more.

## Home screen & settings

From the Home screen, you can explore apps, check notifications, speak commands and more.

- **Add a shortcut:** tap Apps (☰), tap and hold an app, then drag it to your home screen.
- **Settings:** to change your Wi-Fi, display, brightness and more, swipe the status bar down with two fingers. To open more settings, tap ⚙️.
- **Share your phone:** to add a guest user, swipe the status bar down with two fingers and tap 👤.

## Volume & interruptions

Press the side volume button up or down to select a ringer volume from high to vibrate 📵.

Or, tap an option:

- **All:** receive all interruptions and alarms.
- **Priority:** tap ⚙️ to select which interruptions to receive and more. You will always hear alarms.
- **None:** turn off all sounds and alarms. Override sound settings from other apps.

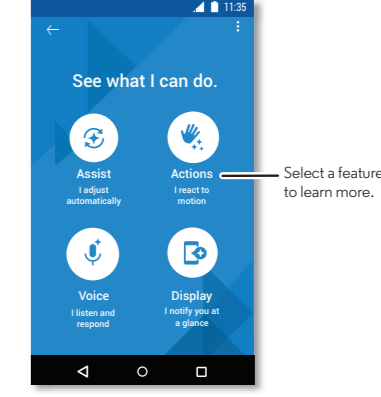

## Discover your Moto apps

**Find it:** Apps (☰) → 🌐 Moto

- **Assist:** set your phone to adapt to what you're doing and where you are.
- **Actions:** learn how to open your camera with two twists of your wrist using Quick Capture.
- **Voice:** set your custom launch phrase and control your Moto X with your voice.
- **Display:** see messages, calls and other notifications — even if your phone is asleep.

**Note:** your phone may not have all features.

## Photos

With two twists of the wrist and a tap on the screen, take crisp, clear photos with the 21 megapixel camera (or the 5 megapixel front camera).

**Launch it:** even when your phone is asleep, open your camera with two twists of your wrist.

**Tip:** swipe right for effects and settings, like panorama.

Tap anywhere to take the photo. Touch and hold for multiple shots.

Swipe right for effects and settings.

Switch to front camera.

Switch to video camera.

## ShatterShield™

Your phone display is guaranteed\* not to crack or shatter. But be careful — you still need to guard against scratches and other minor damage.

Find out more about this innovative display and how to care for it by visiting [motorola.com/shattershield](http://motorola.com/shattershield).

## Email

Check and reply to email messages.

**Find it:** Apps → **Gmail**

You can set up Gmail™ and your other email accounts when you turn on your phone for the first time, or do it later.

**Tip:** want to chat instead? To use Hangouts™ to video or text chat, tap Apps → **Hangouts**.

Tap to search mail.

Tap to choose multiple messages, then tap to select an option.

Swipe left or right to archive a message.

Tap to compose a new email.

## Help & more

Get answers, updates and info:

- **Help is here:** tap Apps → **Help** to access your in-device help for everything from walk-through tutorials, how-to videos, icon glossaries, FAQs and tips for those new to Android.
- **Everything Moto X:** get software, user guides and more at [www.motorola.com/mymotoxforce](http://www.motorola.com/mymotoxforce).
- **Accessories:** get accessories for your phone at [www.motorola.com/mobility](http://www.motorola.com/mobility).
- **Get apps:** tap Apps → **Play Store** to buy and download apps.
- **News:** here's how to find us:
  - YouTube™ [www.youtube.com/motorola](http://www.youtube.com/motorola)
  - Facebook™ [www.facebook.com/motorola](http://www.facebook.com/motorola)
  - Twitter [www.twitter.com/motorola](http://www.twitter.com/motorola)
  - Google+™ [www.google.com/+Motorola/posts](http://www.google.com/+Motorola/posts)

## For your safety

\*The display and embedded lens are warranted against shattering and cracking for four (4) years from the original date of purchase; scratches or other damage to the consumer-replaceable protective lens is not covered by this warranty. This phone is not shockproof or designed to withstand all damage from dropping. All other warranty exclusions, including scratches and other cosmetic damage, intentional damage or abuse, normal wear and tear and other limitations apply; see the Limited Warranty at [www.motorola.com](http://www.motorola.com) for details.

**Warning:** don't try to remove or replace the battery yourself—doing so may damage the battery and could cause burning and injury. If your phone becomes unresponsive, try a reboot—press and hold the Power key until the screen goes dark and your phone restarts.

## Specific absorption rate (ICNIRP)

### YOUR MOBILE DEVICE MEETS INTERNATIONAL GUIDELINES FOR EXPOSURE TO RADIO WAVES.

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves (radio frequency electromagnetic fields) recommended by international guidelines. The guidelines were developed by an independent scientific organisation (ICNIRP) and include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The radio wave exposure guidelines use a unit of measurement known as the Specific absorption rate, or SAR. The SAR limit for mobile devices is 2 W/kg.

Tests for SAR are conducted using standard operating positions with the device transmitting at its highest certified power level in all tested frequency bands\*. The highest SAR values under the ICNIRP guidelines for your device model are listed below:

Head SAR	GSM / WCDMA / LTE, WiFi, Bluetooth	0.549 W/kg
Body-worn SAR	LTE B4, WiFi, Bluetooth	0.781 W/kg

During use, the actual SAR values for your device are usually well below the values stated. This is because, for purposes of system efficiency and to minimise interference on the network, the operating power of your mobile device is automatically decreased when full power is not needed for the call. The lower the power output of the device, the lower its SAR value.

If you are interested in further reducing your RF exposure then you can easily do so by limiting your usage or simply using a hands-free kit to keep the device away from the head and body.

Additional information can be found at [www.motorola.com/rfhealth](http://www.motorola.com/rfhealth).

\* The tests are carried out in accordance with [CENELEC EN50360] [IEC standard PT62209-1].

## Usage

This phone supports apps and services that may use a lot of data, so make sure your data plan meets your needs. Contact your service provider for details. Certain apps and features may not be available in all countries.

This product meets the applicable national or international RF exposure guidance (SAR guideline) when used normally against your ear, or when worn or carried, at a distance of 1.5 cm from the body. The SAR guideline includes a considerable safety margin designed to ensure the safety of all persons, regardless of age and health.
