1. Attention and Precautions

1.1. For your Safety

- Your mobile phone model has been designed to comply with applicable safety requirements for exposure to radio waves. The radio wave exposure guidelines employ a unit of measurement called Specific Absorption Rate (SAR). The recommended SAR limit for mobile handset is 1.6 W/Kg averaged over a 6 minutes period and taken over a volume containing a mass 1g of human tissue.
- The highest SAR value for this mobile phone is much lower than 1.6W/Kg averaged over a 6 minutes period and taken over a volume containing a mass 1 g of human tissue.

Model No. lephone K10 SAR VALUE 0.853W/kg

- Use the phone when the signal strength is good. Keep your calls short or use headset or send a text message. This advice applies especially to children, adolescents and pregnant women. If using headset device, please make sure it has a low power emitter.
- All wireless phones may be susceptible to interference, which could affect performance. The phone may cause interference in the vicinity of TV sets, radio and PCs.

- The mains voltage (V) specified on the power supply unit must not be exceeded. Otherwise the device may be damaged.
- Only qualified personnel may install or repair this product. When connecting to any other product, read its user guide for detailed safety instructions.

1.2. Security Requirements

Before making or answering a call, you should pay attention to the local laws about the use of wireless mobile phones and take them into account in practical use.

- Pay attention to traffic safety. Do not use your mobile phone while driving. Park your vehicle before making or answering a call.
- Switch off your device in any area with a potentially explosive atmosphere, and comply with all signs and instructions.
- Do not use your device while flying in an aircraft. Switch off your device before boarding an aircraft. Using wireless devices in an aircraft may be dangerous to the operation of the aircraft, disrupt the wireless network, and may be considered illegal. Using mobile phone before the plane taking off should get aircrew's permission according to safety regulations.
- Do not use your mobile phone near precision

electronic equipment. Radio wave interference may cause malfunctioning of such electronic equipment and other problems. Operating of mobile phone may interfere with medical devices like hearing aids and pacemakers. When using the mobile phone hold it to the ear which is furthest away from the pacemaker. For more information, please consult your doctor.

- Do not use your phone in a potentially dangerous atmosphere. Please strictly observe with the restrictions on the use of wireless devices.

1.3. Maintenance

- Keep the products out of children's reach.
- Keep your product dry. Do not expose it to liquid or moisture.
- Do not expose your products to extreme high or low temperatures.
- For the first few times, please charge the battery fully.
- Please charge the battery in time when the phone indicates low power.
- Do not overcharging, do not use damaged battery or even an incorrect type.
- Do not expose the battery into fire or throw it away or put it in familial rubbish.
- Return the wear-out battery to the provider or put it

- Do not short-circuit the battery, as this can cause excessive heat to bring about fire.
- Do not attempt to disassemble the mobile phone and battery by yourself.
- Please use original accessories. Using any unauthorized accessories may affect your mobile phones performance.

Note: The performance of your phone depends on your local network operator's card and how you actually use it. We are not responsible for any damages due to inappropriate use. Please read these brief rules. Violation of these rules might cause danger or break laws.

2. Getting Started

2.1. Installing the SIM Card and the Battery

- Remove the battery cover.
- Insert SIM card in SIM slot.
- Insert battery and place the battery cover.
